Managing Editor

D G Fisher PhD FInstP

Executive Editor

K F G Paulus PhD MInstP

Staff Editor

D F Manley BSc

CONTENTS

NO 1, 11 JANUARY 1976

LETTERS TO THE EDITOR

Locus of daylight chromaticities in relation to atmospheric conditions *V D P Sastri* L1

Emission from the (1, 1, 0) face of negative-electron affinity gallium arsenide *M G Burt and J C Inkson* L5

Difficulties in observing direct optical excitation of Si–SiO_2 interface states *K Y Tong and Y W Lam* L9

Investigation of the photochromic effect in erbium-doped tellurite glasses *J G Koen, M A Res, R O Heckroodt and V Haxson* L13

On the calculation of the dipole correlation function for a rigid rotator *W T Coffey and A Morita* L17

PAPERS

Physics applied to Instrumentation and Techniques

Effects of linear fringe fields on the focusing of a parallel electron beam in a symmetric magnetic spectrometer *Andrew A Kosiara* 1

Assessment of Bishop's absorption correction model in electron probe microanalysis *G Love, M G C Cox and V D Scott* 7

Nuclear Physics

Neutron yields and energy spectra from the thick target Li(p, n) source *A I M Ritchie* 15

Structure, Thermal and Mechanical Properties of Condensed Matter

An examination of polished diamond surfaces in the electron microscope *A G Thornton and J Wilks* 27

Electrical, Magnetic and Optical Properties of Condensed Matter

Theoretical calculations of surface-state loss in three-phase charge-coupled devices *M P Singh and D R Lamb* 37

A study of emission from the (1, 1, 1) faces of GaAs negative electron affinity photoemitters *M G Burt and J C Inkson* 43

Properties of silicon–metal contacts versus metal work-function, silicon impurity concentration and bias voltage *B Pellegrini* 55

An experimental study of the electrical properties of the contact between two similar semiconductor crystals *J W Orton, A H M Kipperman and J A Beun* 69

TSD current studies of iodine-doped polyvinyl-acetate thin films *P C Mehendru, K Jain and Praveen Mehendru* 83

Electrical resistivity, TCR and thermoelectric power of annealed thin copper films *V V R Narasimha Rao, S Mohan and P Jayarama Reddy* 89

New observations of pre-breakdown events in n-hexane in a point–plane configuration *F Heiman, P Sibillot and R Coelho* 95

A Monte Carlo approach to the direct simulation of electron penetration in solids *R Shimizu, Y Kataoka, T Ikuta, T Koshikawa and H Hashimoto* 101

Materials Science and Metallurgy

Tensile strength of discontinuous fibre composites—the effect of fibre/matrix interface strength *J Yamaki* 115

Frictional properties of explosives *J K A Amuzu, B J Briscoe and M M Chaudhri* 133

NO 2, 1 FEBRUARY 1976

LETTERS TO THE EDITOR

The application of nonlinear optics methods to studies of transfer RNA in solution
A Dobek, A Patkowski and D Labuda L21
Moderator heating by neutron slowing down *M M R Williams* L25
Extended fine structure above the x-ray edge in electron energy loss spectra
R D Leapman and V E Cosslett L29

PAPERS

Physics applied to Instrumentation and Techniques

Temperature oscillations induced in a mercury bath by horizontal heat flow
B K Pamplin and G H Bolt 145
Efficient magnetic flier plate propulsion *R Bealing and P G Carpenter* 151
Consistent theory of electron scattering with atoms in electron microscopes *K Kanaya and S Ono* 161
Image processing of dark-field electron micrographs *W Krakow, K B Welles and B M Siegel* 175

Electromagnetism, Optics and Quantum Optics

Surface imaging by scanning-laser-induced voltage *A Olivei* 183

Gases and Fluid Dynamics

The interaction of a shock with a dust deposit *B Fletcher* 197
Evidence for cavitation in fluorocarbon liquids subjected to alternating electric fields
J K Nelson and I F M Hashad 203

Structure, Thermal and Mechanical Properties of Condensed Matter

Etchants to reveal the sites of edge dislocations on (010) cleavage planes of glycine crystals
R M Chaudhari and R S Bharambe 211
Laser-induced damage to semiconductors *Y Matsuoka* 215
The thermal resistivity of diamond heat-sink bond materials *P R W Hudson* 225
The compositional and structural changes that accompany the thermal annealing of (100) surfaces of GaAs, InP and GaP in vacuum *C R Bayliss and D L Kirk* 233

Electrical, Magnetic and Optical Properties of Condensed Matter

Negative resistance and memory effects in GaTe single crystals
C Paorici, N Romeo and L Tarricone 245
Photon-stimulated current analysis of trap parameters in anthracene
J D Brodribb, D O'Colmain and D M Hughes 253
Compensation and the mechanisms of electrical conduction in plasticized PVC *R Dewsberry* 265
Electrical conduction in the $ZnSiAs_{2-x}P_x$ system *R F Stroud and W C Clark* 273
On the flux jumps in hard superconductors *M G Kremlev, R G Mints and A L Rakhmanov* 279
Eddy current loss calculations for skew, braket and wedge domain walls as in (110) [001] SiFe laminations *J E L Bishop* 291
High-performance multilayer interference filters for the region 12–50 μm
C S Evans, R Hunneman and J S Seeley 309
Optical thickness changes in freshly deposited layers of lead telluride
C S Evans, R Hunneman and J S Seeley 321

Materials Science and Metallurgy

Stresses and displacements in lamellar composites: Part II *R G C Arridge and M W B Lock* 329
An evaluation of acoustic emission techniques applied to carbon-fibre composites
M Fuwa, A R Bunsell and B Harris 353
Fatigue crack propagation in metal-matrix/metal-fibre composites
B Harris, A O Ankara and M A McGuire 365

NO 3, 21 FEBRUARY 1976

LETTERS TO THE EDITOR

Spectroscopic observations of the plasma generated with the 1 GW output of a carbon dioxide laser *G E Bromage, T P Donaldson, B C Fawcett and I J Spalding* L33
The violation of similarity laws in electrical discharges in gases *E D Lozansky and G B Pontecorvo* L37

PAPERS

Plasmas and Electrical Discharges

The interaction of CO_2 laser radiation with various solid targets *P E Dyer, S A Ramsden, J A Sayers and M A Skipper* 373
X-ray emission and hydrodynamic expansion of plane carbon targets under the influence of high-intensity laser radiation *M C Marsh and P C Thompson* 383
Influence of a negatively biased grid on the plasma in a single-ended *Q*-machine *G Popa, N Sato, E Mark, R Schrittwieser and E Mravlag* 397
Gas ionization on the axis of a circular waveguide *H Beerwald, G Böhm and B Kampmann* 407
Field measurements in a pinch discharge using a magneto-optical-probe *P Smeulders* 413
Time-resolved laser–Doppler measurements in a high-current arc plasma *P S Todorovic, G R Jones and M R Barrault* 423
Axial velocity variations in high-current free-burning arcs *D C Strachan and M R Barrault* 435
Radio-frequency pulse discharge for investigating reactions in electrical discharges *J E Nicholas and P W Smith* 447
Analytic solutions to the Boltzmann equation for electron swarms *J L A Francey and D A Jones* 457
The motion of electron swarms in uniform electric fields *H A Blevin, J Fletcher and L M Marzec* 465
An experimental study of photons from a Townsend discharge in hydrogen *H A Blevin, J Fletcher, S R Hunter and L M Marzec* 471
Total ionization and dissociative attachment cross-sections of boron trifluoride by electron impact *M V Kurepa, V M Pejčev and I M Čadež* 481
Computer simulation of a nitrogen discharge considering the radial electron drift *K Yoshida and H Tagashira* 485
Computer simulation of a nitrogen discharge at high overvoltages *K Yoshida and H Tagashira* 491
Determination of gas temperature from unresolved bands in the spectrum from a nitrogen discharge *D M Phillips* 507
Combined spatial and temporal studies of ionization growth in nitrogen *S C Haydon and O M Williams* 523
Transitions between thermionic and vapour arc modes *A J T Holmes* 537

NO 4, 11 MARCH 1976

LETTERS TO THE EDITOR

Hole drilling with a repetitively-pulsed TEA CO_2 laser *D C Hamilton and D J James* L41
Electrophoretic instability in a diffusion-free dielectric liquid in an annular geometry *A T Richardson and R Poulter* L45
Microhardness and Schottky defects in alkali halides *M Shukla and K G Bansigir* L49

PAPERS

Physics applied to Instrumentation and Techniques

Génération d'une onde ultrasonore plane en forme d'échelon: application a l'étalonnage de récepteurs piézoélectriques *F Lakestani, J C Baboux, P Fleischmann et M Perdrix* 547

Mathematical Physics
Elastic reinforcement by randomly coiled wires — *S F Edwards and A G Miller* 555
Seismic rays in an oblate spheroidal model — *L Y Shih* 571

Electromagnetism, Optics and Quantum Optics
The resolution limit in ion beam experiments due to small angle scattering off background gas — *R L Dalglish and J C Kelly* 581

Structure, Thermal and Mechanical Properties of Condensed Matter
The application of the convolution relations in x-ray line breadth analysis: II — *R K Nandi and S P Sen Gupta* 593
The application of the convolution relations in x-ray line breadth analysis: III — *R K Nandi and S P Sen Gupta* 601
Transmission electron microscopic studies of stacking faults in molybdenum diselenide — *M K Agarwal and B Joseph* 607
Direct observation of the flux distribution in the mixed state of V–Ga alloys using a scanning electron microscope — *O Singh, A E Curzon and C C Koch* 611
A cinematographic study of the quenching process in ionic crystals — *R A Keeley and M T Sprackling* 615
The thermal conductivity of 'isotropic' and hot-pressed boron nitride — *A Simpson and A D Stuckes* 621

Electrical, Magnetic and Optical Properties of Condensed Matter
Transients in p–n-junction solar cells — *S R Dhariwal, L S Kothari and S C Jain* 631
A study of the interface between germanium and silicon — *J R Crooks and M J Hampshire* 643
Direct measurement of contamination and etching rates in an electron beam — *R F Egerton and C J Rossouw* 659

Materials Science and Metallurgy
The thermal conductivity of epoxy-resin/metal-powder composite materials from 1·7 to 300 K — *F F T de Araujo and H M Rosenberg* 665

CORRIGENDA

Frictional properties of explosives — *J K A Amuzu B J Briscoe and M M Chaudhri* 677

NO 5, 1 APRIL 1976

LETTER TO THE EDITOR

Why use kermas for nuclear heating calculations? — *T D Beynon and N P Taylor* L53

PAPERS

Physics applied to Instrumentation and Techniques
A direct-view thermal imaging tube — *H A H Boot, J G Castledine, P G R King, K E Trezise and B Turner* 679

Electromagnetism, Optics and Quantum Optics
Molecular beam maser oscillation on the $J=K=1$ inversion line of $^{14}NH_3$ — *A K H Maroof and D C Laird* 697
A multi-gigawatt liquid laser amplifier — *M Green, D Andreou, V I Little and A C Selden* 701

Gases and Fluid Dynamics

The calculation of temperature distribution, heat flow, component diffusion flows and reaction rates in tungsten halogen lamps — *S Lengyel* 709

The flow of dilute aqueous solutions of macromolecules in various geometries: I. Introduction — *W M Jones* 721

The flow of dilute aqueous solutions of macromolecules in various geometries: II. Straight pipes of circular cross-section — *W M Jones, D E Marshall and P C Walker* 735

The flow of dilute aqueous solutions of macromolecules in various geometries: III. Bent pipes and porous materials — *W M Jones and O H Davies* 753

The flow of dilute aqueous solutions of macromolecules in various geometries: IV. The Ergun and Jones equations for flow through consolidated beds — *W M Jones* 771

Electrical, Magnetic and Optical Properties of Condensed Matter

Two-dimensional simulation of the charge transfer process in charge-coupled devices using a particle model — *W Fawcett and G F Vanstone* 773

Transmission silicon photoemitters and electron multipliers — *J R Howorth, J R Folkes, I C Palmer, R Holton, C J R Sheppard and E W L Trawny* 785

Study of photoconductive PbTe films by the method of variance analysis of x-ray diffraction profiles — *N L P Sinha, B K Samantary, A K Chaudhuri and H N Bose* 795

The electrical properties of zinc selenide — *G Jones and J Woods* 799

The field of the propagating circuits of bubble devices — *W A Wanas* 811

The measurement of dielectric anisotropy using a microwave open resonator — *R G Jones* 819

On the nature of absorption currents in polyethyleneterephthalate (PET) — *D K Das Gupta and K Joyner* 829

The effect of organic additives on the breakdown and gassing properties of mineral oils — *A A Zaky, I Y Megahed and C Evangelou* 841

A luminescent and fluorescent region associated with prebreakdown and breakdown in n-hexane — *C Chiu* 851

Materials Science and Technology

The indentation behaviour of hard metals — *C J Studman and J E Field* 857

Static and dynamic mechanical and optical behaviour of high polymers — *D D Raftopoulus, D Karapanos and P S Theocaris* 869

Biophysics

Ionographic autoradiography: charge distributions and electric field patterns — *R J Barish, R A Fox and J W Boag* 879

NO 6, 21 APRIL 1976

LETTERS TO THE EDITOR

The open-circuit voltage of vertical-junction solar cells — *M A Green* L57

The effect of water on thermally stimulated currents in PTFE — *M R Grinter and C Bolt* L61

PAPERS

Electromagnetism, Optics and Quantum Optics

Ray-optical analysis of the prism–film coupling efficiency in optical waveguides — *P S Chung* 887

Gases and Fluid Dynamics

A thermodynamical study of halogen lamps with carbon additive — *T Geszti and T Vicsek* 903

The erosion of dust by an airflow — *B Fletcher* 913

Structure, Thermal and Mechanical Properties of Condensed Matter

An analysis of a flow instability in nematic liquid crystals *F M Leslie* 925

X-ray powder diffraction studies of deformation faults in the metastable face-centred cubic phase of copper–zinc alloys *E Magee and W J Kitchingman* 939

Electrical, Magnetic and Optical Properties of Condensed Matter

Determination of boron in natural semiconducting diamond by prompt particle nuclear micro-analysis and Schottky barrier differential-capacitance measurements *E C Lightowlers and A T Collins* 951

Silicide formation in Ni–Si Schottky barrier diodes *D J Coe and E H Rhoderick* 965

The electrical properties of ultrathin gold films during and after their growth on glass *T Andersson* 973

Distribution of surface charges on Perspex due to partial discharge *I Sen and V Prabhashanker* 987

Optical diffraction studies of sound waves in lithium niobate *W S Goruk, R Normandin, P J Vella and G I Stegeman* 999

The effect of cooling rate on the performance of thermoluminescent dosimeter crystals (TLD-100) and LiF crystals *M H Bradbury, B C E Nwosu and E Lilley* 1009

Intrinsic energy losses of field-evaporated ions *A R Waugh and M J Southon* 1017

Materials Science and Technology

Switching behaviour and DC electrical conductivity of epoxy-resin/metal-powder composites *F F T de Araujo and H M Rosenberg* 1025

Stress distribution and elastic properties of duplex reinforcing elements with non-fracturing helical cores *J G Morley, R S Millman and A Martin* 1031

The interpretation of the stress intensity term in the 'equation for polymer life' *E Sacher* 1049

Deformation and fracture of poly(ethylene terephthalate) *G L A Sims* 1053

The ultrasonic stress distribution in a specimen with a circular gauge profile *C H Green and F Guiu* 1063

The ultrasonic fatigue testing of specimens much shorter than the testing frequency half-wavelength of the material *C H Green and F Guiu* 1071

NO 7, 11 MAY 1976

LETTER TO THE EDITOR

Comments on Holmes and Cozens' theory of the gas density distribution near the cathode of an abnormal glow discharge *J C Sherman* L63

PAPERS

Plasmas and Electrical Discharges

The application of low-pressure experimental data to the calculation of electrical discharge thresholds in compressed gases *B H Crichton and D J Tedford* 1079

Integral methods of analysing electric arcs: III. Shape-factor correlation for low radiation and laminar flow *S K Chan, M D Cowley and M T C Fang* 1085

The instability of electric arcs burning axially in accelerated flow *A M Howatson and D R Topham* 1101

Thermionic emission of an oxide cathode in a low-pressure gas discharge *A Bouwknegt and A G van der Kooi* 1111

A simplified theory for Tonks–Dattner resonances in cylindrical plasmas *J A How and H A Blevin* 1123

Electrical conductivity of highly ionized dense hydrogen plasma: I. Electrical measurements and diagnostics *R Radtke and K Günther* 1131

Electrical conductivity of highly ionized dense hydrogen plasma: II. Comparison of experiment and theory *K Günther, M M Popovic, S S Popovic and R Radtke* 1139

Un canon à ions suprathermiques (5–50 eV) pour l'étude des interactions décharge–surface *G Gautherin et C Lejeune* 1149

Beam optics for ion extraction with a high-voltage-ratio acceleration–deceleration system
T S Green 1165

The AC motion of the sheath edge in a flowing high-pressure plasma
B M Oliver, R M Clements and P R Smy 1173

CORRIGENDA

The interaction of CO_2 laser radiation with various solid targets
P E Dyer, S A Ramsden, J A Sayers and M A Skipper 1181

NO 8, 1 JUNE 1976

LETTERS TO THE EDITOR

Radiation damage and the magnetic domain structure of amorphous GdCo thin films
A Ali, P J Grundy and G A Stephens L69

Radiation-induced current–field characteristics of a triode test cell containing a dielectric solid
C M Feeley and T J Gallagher L73

Effect of polarity gap length on the breakdown characteristics of mineral oil for non-uniform fields
A A Zaky, A Nosseir, I Y Megahed and C Evangelou L77

Magneto-optic diffraction and magnetization of thin films
S Kern and D J Craik L81

PAPERS

Electromagnetism, Optics and Quantum Optics

Frictional electrification
M I Kornfeld 1183

Time-dependent solutions of the vibrational non-equilibrium flow of CO_2–N_2–H_2O–O_2 mixtures in gas dynamic lasers
A T Jones 1193

Nuclear Physics

The effect of inelastic scattering on neutron time–energy distribution in an infinitely heavy medium
K Yamamoto and T Sekiya 1209

Gases and Fluid Dynamics

The molecular and reactive thermal conductivities and accommodation coefficients of dissociating hydrogen up to 2400 K
B Stefanov and L Zarkova 1217

Temperature measurements in detonation waves by emission–absorption of the OH ultraviolet bands
D H Edwards and D E Phillips 1227

Pressure variation within concentrated settling suspensions
J F Raffle 1239

Structure, Thermal and Mechanical Properties of Condensed Matter

The effect of supersaturation on the induction period of potassium dihydrogen phosphate crystals grown from aqueous solution
B K Paul and M S Joshi 1253

A study of crystals in the lead dioxide/tellurium dioxide system
D S Robertson, N Shaw and I M Young 1257

Electrical, Magnetic and Optical Properties of Condensed Matter

The variation of coercivity with particle size
G Rowlands 1267

Thermoluminescence of LiF TLD-100 by phototransfer
C M Sunta and S Watanabe 1271

NO 9, 21 JUNE 1976

LETTERS TO THE EDITOR

On the origin of asymmetry in the two-site hopping model under a high electric field
H Adachi, Y Yamazaki, T Hariu and Y Shibata L85
Prebreakdown phenomena in liquids: electronic processes
J C Devins, S J Rzad and R J Schwabe L87
Extension of the Maxwell-Wagner equation for conducting dielectrics *D L Jeffrey* L93

PAPERS

Mathematical Physics

An exact solution to the problem of the time–energy distribution of fast particles slowing down in a multi-species medium *M M R Williams* 1279
Self-triggering of small-scale fuel–coolant interactions: I. Experiments
T A Dullforce, D J Buchanan and R S Peckover 1295

Electromagnetism, Optics and Quantum Optics

A collision model of charge exchange between metal and polymer spheres *S K Ahuja* 1305
TE and TM modes in gyrotropic waveguides *J R Gillies and P Hlawiczka* 1315
Absolute frequencies of the methane-stabilized HeNe laser (3·39 μm) and the CO_2, R(32) stabilized laser (10·17 μm) *T G Blaney, G J Edwards, B W Jolliffe, D J E Knight and P T Woods* 1323

Gases and Fluid Dynamics

The location of the Chapman–Jouguet surface in a multiheaded detonation wave
D H Edwards, A T Jones and D E Phillips 1331

Structure, Thermal and Mechanical Properties of Condensed Matter

Refractive index profiles induced by ion implantation into silica *A P Webb and P D Townsend* 1343

Electrical, Magnetic and Optical Properties of Condensed Matter

Electron-beam-induced conduction in polyethylene terephthalate films
L M Beckley, T J Lewis and D M Taylor 1355
The influence of a random domain size distribution on the eddy-current contribution to hysteresis in transformer steel *J E L Bishop* 1367
The surface layer effect in TOS, KDP and Rochelle salt *A Mansingh and Eswar Prasad SRJ* 1379
Comparison of deflection and modulation characteristics of symmetrically and asymmetrically electroded electro-optic devices *V Ramachandran and A W Palmer* 1387

Geophysics

A Mössbauer effect study of plant and animal fossils
N A Eissa, H A Sallam, B A Ashi, M Y Hassan and S A Saleh 1391

NO 10, 11 JULY 1976

LETTERS TO THE EDITOR

Absorption saturation in p-type germanium *P J Bishop, A F Gibson and M F Kimmitt* L101
Ignition of thermonuclear microexplosions inside an egg-shaped cavity *F Winterberg* L105
A time-dependent anomalous threshold in silicon MOS devices fabricated on high-resistivity substrates *R J Nicholas and R A Stradling* L109
The electrical polarizability of a two-dimensional itinerant oscillator
W T Coffey, T Ambrose and J H Calderwood L115
A V_2O_5 phosphate filter glass with bandpass in the visible region
M A Res, C J Kok and J Bednarik L119

PAPERS

Electromagnetism, Optics and Quantum Optics
Photon correlation study of laser speckle produced by a moving rough surface *P N Pusey* 1399

Gases and Fluid Dynamics
The break-up of a submerged captive drop of liquid by a jet of the surrounding liquid *D B Scully* 1411
Pumping action from heat-driven oscillations in a liquid–vapour column
J W Sheldon, R A Crane and S C Kranc 1419
Studies on the settlement of hydrating cement suspensions *A King and J F Raffle* 1425

Electrical, Magnetic and Optical Properties of Condensed Matter
Contact electrification of polymers *R Elsdon and F R G Mitchell* 1445
The demagnetizing field of elliptical cylindrical domains *M A Wanas and N H Hegazi* 1461
The temperature dependence and heat treatment behaviour of epitaxial $(YSmCa)_3(FeGe)_5O_{12}$
M E Jones and P J Fiddyment 1467
Dielectric and interface-state measurements of metal–spin-on-oxide–silicon capacitors
Y W Lam and H C Lam 1477
The effects of temperature and pressure on the complex dielectric permittivity of liquid eugenol and glycerol *W G S Scaife* 1489
The behaviour of a 10·6 μm pulsed spin–flip Raman laser as a spectroscopic source
B Walker, G W Chantry, D G Moss and C C Bradley 1501
Cathodoluminescence of CaS:Ce phosphor *D R Vij, V K Mathur, V Shanker and P K Ghosh* 1509
Optical properties of discontinuous gold films *D N Jarrett and L Ward* 1515

Materials Science and Metallurgy
The failure of composite materials under high-velocity liquid impact *D A Gorham and J E Field* 1529

Physical Chemistry
The behaviour of some dimethyl- and trimethyl-substituted pyridines in the magnetron
F L Failes, J T Joyce and E C Watton 1543

Applied Acoustics
The impulse response and pressure nearfield of a curved ultrasonic radiator
A Penttinen and M Luukkala 1547

NO 11, 1 AUGUST 1976

LETTERS TO THE EDITOR

The measurement of positive and negative pressures in a liquid contained in a Berthelot tube
B E Richards and D H Trevena L123
Harmonic generation in $1/f$ noise *D A Bell* L127
Long-life green n/p semiconductor lamps *J R Fitzpatrick, B F Jones and K J Downton* L129
Domain observation in MnBi films with the scanning electron microscope
R Atkinson and G A Jones L131

PAPERS

Mathematical Physics
Some explicit solutions to the non-linear diffusion equation *B Tuck* 1559

Electromagnetism, Optics and Quantum Optics
The electrification of polymers by metals *J Lowell* 1571
Negative effects in TEA CO_2 lasers *H Shields, A L S Smith and B Norris* 1587

Electrical, Magnetic and Optical Properties of Condensed Matter

Electrical properties of $Zn_xHg_{1-x}Te$ thin films *M C Petty and C Juhasz* 1605

Charge, current and electric field development in a film of insulating material with traps *J Q Bartling* 1619

The optical properties of thin films of cadmium and zinc selenides and tellurides *Thutupalli G K M and S G Tomlin* 1639

An empirical calculation of the energy loss of transmitted electrons at 25–100 keV *V Lantto* 1647

Physical Chemistry

Temperature distribution, heat transport, diffusion fluxes and reaction rates in an incandescent lamp with a carbon filament and CF_4 as the active component *S Lengyel* 1655

Applied Acoustics

Ultrasonic pulse transmission in cylindrical waveguides *R H Varey* 1661

NO 12, 21 AUGUST 1976

LETTERS TO THE EDITOR

The electron temperature in a positive column with volume recombination *J-S Chang* L137

Comportement de divers matériaux utilisés comme électrodes d'un générateur de plasma en courant alternatif triphasé *C Bonet, M Foex, R Munz and W H Gauvin* L141

Calculating the effect of high temperatures on the onset voltages of negative discharges *M Abdel-Salam* L149

H_α and H_β broadening emitted by minute concentrations of hydrogen corona discharges *F Bastien, B Fertil and E Marode* L155

PAPERS

Plasmas and Electrical Discharges

The electron drift velocity and longitudinal diffusion coefficient of an electron swarm in hydrogen at elevated swarm energies *H A Blevin, J Fletcher and S R Hunter* 1671

The stability of shock waves in ionizing and dissociating gases *R W Griffiths, R J Sandeman and H G Hornung* 1681

The continuous flow pinch for production of hot and dense plasma *N F Tsagas and A E Prinn* 1693

Double-probe theory for a continuum low-density plasma *J-S Chang and J G Laframboise* 1699

Plasma diagnosis of a Hall accelerator discharge *P J Lomas* 1705

The effect of relaxation of the quasi-neutral region on the impedance of a planar probe in a static collisional plasma *B M Oliver, R M Clements and P R Smy* 1715

Energy storage and extraction in selected CO_2 laser gases *E Armandillo and I J Spalding* 1719

Electron swarm parameters in CO_2 laser gas mixtures *C S Lakshminarasimha, J Lucas, J L Moruzzi and I J Spalding* 1727

The Townsend coefficient of ionization in dense gases and fluids *V M Atrazhev, I T Iakubov and V I Roldughin* 1735

Etude des écarts a l'ETL dans un arc d'argon (P=760 Torr) *J Bacri, A M Gomes et S Benzaid* 1743

Transient behaviour of interrupted arcs in steady laminar flow *M T C Fang, S K Chan and M D Cowley* 1757

Erosion of metal cathodes by arcs and breakdowns in vacuum *E Hantzsche, B Jüttner, V F Puchkarov, W Rohrbeck and H Wolff* 1771

Pulvérisation cathodique du titane: étude électrique et spectrometrique de la décharge pour les conditions optimales de dépôt *J M Poitevin, G Lempériere and C Fourrier* 1783

A new model of microdischarge current growth in vacuum *B P Singh and P A Chatterton* 1797

Optimum conditions for testing electrical fuses: I. Maximization of prearcing energy *C B Wheeler* 1809

CORRIGENDA

Computer simulation of a nitrogen discharge at high overvoltages *K Yoshida and H Tagashira* 1817

NO 13, 11 SEPTEMBER 1976

LETTER TO THE EDITOR

20–50 MeV proton-induced x-ray fluorescence from heavy elements
J S C McKee, C P Randell and S F J Wilk L159

PAPERS

Physics Applied to Instrumentation and Techniques
The effect of non-uniform illumination on the two-point resolution of a microscope using a semi-transparent and π-phase annular aperture *V P Nayyar and N K Verma* 1819
A simple method of determining diffusion constants by holographic interferometry
N Bochner and J Pipman 1825

Electromagnetism, Optics and Quantum Optics
Production and location of background fringes *K A R Kinloch and S M Fraser* 1831
A light scattering technique for particle sizing based on laser fringe anemometry
N S Hong and A R Jones 1839
On the validity of the weak-phase and other approximations in the analysis of electron microscope images *D L Misell* 1849

Structure, Thermal and Mechanical Properties of Condensed Matter
An x-ray diffraction profile analysis of vacuum-evaporated copper films: normal and oblique vapour incidence *S K Halder, S Sen and S P Sen Gupta* 1867

Electrical, Magnetic and Optical Properties of Condensed Matter
Trap distribution in $ZnIn_2S_4$ from photoconductivity analysis *A Serpi* 1881
The influence of the second harmonic on the fundamental frequency negative conductance of GaAs Gunn devices *P C Mathur, A K Dhall, S K Lomash and M L Goyal* 1893
Estimation of the number of domain walls during flux reversal in 50% Ni–Fe tape cores
Y Sakaki and T Anayama 1899
Ionization loss of relativistic electrons and its fluctuations in gas proportional counters
K Nagata, A Kuge, A Nakamoto, N Hasebe, K Kikuchi and T Dobe 1907

Materials Science and Metallurgy
Acoustic emission from a notched glass-fibre-reinforced polymer in bending
J T Barnby and T Parry 1919

Applied Acoustics
Sound pressure near the focal area of an ultrasonic lens *A Penttinen and M Luukkala* 1927

CORRIGENDA

Two-dimensional simulation of the charge transfer process in charge-coupled devices using a particle model *W Fawcett and G F Vanstone* 1937
The ultrasonic stress distribution in a specimen with a circular gauge profile
C H Green and F Gulu 1937

NO 14, 1 OCTOBER 1976

LETTERS TO THE EDITOR

Field emission studies of the lanthanum hexaboride/tungsten system
P L Kanitkar, C V Dharmadhikari, D S Joag and V N Shukla L165
The observation of stripe domains in amorphous GdCo films prepared by evaporation
S S Nandra and P J Grundy L167

PAPERS

Physics applied to Instrumentation and Techniques
The determination of the refractive index and thickness of a transparent film *E E Khawaja* 1939
The direct determination of the temperature dependence of the refractive index of liquids and solids *G Abbate, A Attanasio, U Bernini, E Ragozzino and F Somma* 1943
High-resolution profiling of high-energy ion beams *R W Bicknell* 1953

Electromagnetism, Optics and Quantum Optics
Elliptically polarized modes in gyrotropic waveguides *P Hlawiczka* 1957

Gases and Fluid Dynamics
The flow of dilute aqueous solutions of macromolecules in various geometries: V. Between rotating coaxial cylinders (Couette flow) *W M Jones, A H Thomas and M C Thomas* 1967
Limiting negative pressure of water under dynamic stressing *S A Sedgewick and D H Trevena* 1983
A study of spherical detonation in mixtures of methane and oxygen diluted by nitrogen *D C Bull, J E Elsworth, G Hooper and C P Quinn* 1991

Structure, Thermal and Mechanical Properties of Condensed Matter
Tilt angle measurements of nematic phases of cyano-biphenyls aligned by obliquely evaporated films *W A Crossland, J H Morrissy and B Needham* 2001
A theory dealing with the vacuum evaporation and deposition of binary semiconducting compounds, with special reference to the thermal evaporation of zinc selenide *D L Kirk and M S Raven* 2015

Electrical, Magnetic and Optical Properties of Condensed Matter
Origin of absorption and resorption currents in the co-polymer poly(hexafluoropropylene-tetrafluoroethylene) *P J Atkinson and R J Fleming* 2027
A study of absorption currents in polypropylene *D K Das Gupta and K Joyner* 2041
The electrical conductivity and its relationship to the glass transition temperature of plasticized polyacrylonitrile *R Dewsberry* 2049
The GaAs/Zn solidus at 1000 °C *B Tuck* 2061
High-field effects in chalcogenide switching glasses *D Allsop and M J Thompson* 2075
An electrical resistance analysis of the erbium–hydrogen system *B Singh, N A Surplice and J Müller* 2087
Eddy-current-limited growth of ferromagnetic domains on the surface of square-loop alloy tapes *J E L Bishop* 2095
Use of persistent supercurrents in SQUID current stabilizers and their application to a resistivity measurement on niobium *J C Gallop* 2111
The effect of cobalt substitutions on some properties of manganese zinc ferrites *A D Giles and F F Westendorp* 2117
Scattering of 2–20 keV electrons in aluminium *A J Green and R C G Leckey* 2123
Interpretation of the surface boundary conditions in the diffusion model for NEA photoemission *M G Clark* 2139
Effect of overlayer thickness on electron emission from Si:Cs–O NEA surfaces *M G Clark, J R Howorth and R Holtom* 2155

CORRIGENDA

A collision model of charge exchange between metal and polymer spheres *S K Ahuja* 2169
Transmission silicon photoemitters and electron multipliers *J R Howorth* et al 2169

NO 15, 21 OCTOBER 1976

LETTERS TO THE EDITOR

Comments on oscillation amplitude settling transients in a hydrogen maser evoked by rapid frequency scanning *H W Lightfoot and D C Lainé* L171

Anomalous behaviour of an ammonia beam maser employing a ring focuser
M J Truman and D C Laird L175
The relationship of time-dependent hardness and scratch hardness *A P Gerk* L179
Short resistive contacts to Hall specimens *H J Goldsmid and C J Milner* L183
The energies of ions and neutrals in ion plating *D G Teer* L187
Comments on 'intrinsic energy losses of field-evaporated ions' *R G Forbes* L191

PAPERS

Electromagnetism, Optics and Quantum Optics
Observation of higher-order lines (ghosts) due to the non-linearity of the film's transmittance–exposure character in holographic Fourier transform spectroscopy
Lin-kuan Su, Chuen-lap Leung and Shih-yu Feng 2171
Harmonic mixing and frequency measurement at 2·5 THz using Josephson junctions
T G Blaney, N R Cross and D J E Knight 2175
Hydrodynamic limit to penetration of a material by a high-power beam
J G Andrews and D R Atthey 2181

Atomic and Molecular Physics
The origin of spurious peaks in mass spectra *J H Neave and B A Joyce* 2195

Structure, Thermal and Mechanical Properties of Condensed Matter
Indentation plasticity and the ensuing fracture of glass *M V Swain and J T Hagan* 2201
Epitaxial growth of chromium electrodeposits on oriented single-crystal surfaces of austenitic stainless steel *B Rivolta, M Lazzari and L P Bicelli* 2215

Electrical, Magnetic and Optical Properties of Condensed Matter
Electrical resistivity anisotropy measurement *J E Aubrey and K Anagnostopoulos* 2221
Application of the phase diagram to the diffusion of Zn in GaP *B Tuck and P R Jay* 2225
The chemical nature of the interface in Ge–ZnSe heterojunctions: a study with molecular beam techniques *A W Brinkman and D L Kirk* 2239
Barrier heights and surface states of metal–polymer (PET) contacts
T Mizutani, Y Takai, T Osawa and M Ieda 2253
The electrical resistivity and temperature coefficient of resistivity of cobalt films
A K Pal, S Chaudhuri and A K Barua 2261
Electron-beam charging of polyethylene terephthalate films *D M Taylor* 2269
On the theory of flux jumps in hard superconductors *R G Mints and A L Rakhmanov* 2281
Electrical breakdown of mineral oil under non-uniform fields
A A Zaky, A Nosseir, I Y Megahed and C Evangelou 2287
A theoretical interpretation of the pyroelectric response from a scanning micro heat probe
R V Latham 2295
Optical absorption in $Zn_xHg_{1-x}Te$ thin films *M C Petty and C Juhasz* 2305

NO 16, 11 NOVEMBER 1976

PAPERS

Plasmas and Electrical Discharges
Some modifications of the theory of colloidal plasmas *B R De* 2317
Jump conditions across a collisionless, perpendicular shock *J J Sanderson* 2327
A note on the generalized sheath criterion *J E Allen* 2331
One-dimensional radial compression theory in a continuous flow pinch *N F Tsagas* 2333
Enhanced reflection of laser light from an expanding plasma *I M Begg and R A Cairns* 2341
Theory of electrostatic probes in a low-density flowing continuum plasma: numerical solutions for a sphere stagnation point *K Kodera and J-S Chang* 2349

Ionization, attachment and negative ion reactions in carbon dioxide *S R Alger and J A Rees* 2359
Analysis of flashes accompanying discharges in air at dielectric surfaces
J S Brzosko, A Konarzewski, A Wojewódzka, E Żukowski and J Grudziński 2369
Components of cathode erosion in vacuum arcs *J E Daalder* 2379
Micro-particle detection in an electrically stressed vacuum gap *J Smalley* 2397
Ionization in the short pulsed arc *P R Smy* 2403

NO 17, 1 DECEMBER 1976

LETTER TO THE EDITOR

Time-lag characteristics of a liquid trigatron *J L Maksiejewski and J H Calderwood* L195

PAPERS

Physics Applied to Instrumentation and Techniques
Measurements of optical distortion arising from thermal turbulence with application to bubble chambers *V Toal* 2413

Electromagnetism, Optics and Quantum Optics
Resonance anomalies in the light intensity reflected at silver gratings with dielectric coatings *I Pockrand* 2423
Line broadening and saturation parameters for short-pulse high-pressure iodine photodissociation laser systems *H J Baker and T A King* 2433
An analysis of the accuracy of time-of-flight ranging at very low signal levels *G J Perri* 2447

Nuclear Physics
The time–energy distribution of atoms in a radiation damage cascade *M M R Williams* 2463

Gases and Fluid Dynamics
The incipient motion of granular materials *B Fletcher* 2471

Electrical, Magnetic and Optical Properties of Condensed Matter
The mobility of fast charge carriers in liquid paraffins and its dependence on molecular structure *I Adamczewski and J H Calderwood* 2479
Free rotational models for far-infrared absorptions of linear and symmetrical-top molecules dissolved in inert solvents *A Morita, S Walker and J H Calderwood* 2485
Multiple scattering of fast electrons and their secondary electron generation within semi-infinite targets *H-J Fitting, H Glaefeke, W Wild and G Neumann* 2499

Materials Science and Metallurgy
Growth striations in $KBr(PbI_2)$ single crystals growth from aqueous solution *A R Patel and B P Agarwal* 2511
The friction of carbon fibres *I C Roselman and D Tabor* 2517

NO 18, 21 DECEMBER 1976

LETTERS TO THE EDITOR

On corona light emission in dielectric liquids *H Metzler and W F Schmidt* L199
An estimate of the ultimate tensile strength of water *S A Sedgewick and D H Trevena* L203

PAPERS

Electromagnetism and Optics

Iterative algorithms for single-side-band holography in bright- and dark-field microscopy
A Lannes 2533

Structure, Thermal and Mechanical Properties of Condensed Matter

A rapid optical method for the determination of stress-optical constants of optically isotropic and anisotropic materials *S V Kartalopoulos and D D Raftopoulos* 2545

Interpretation of the temperature dependence of partition and sticking coefficients for antimony, phosphorus and boron in silicon *R J Bennett and C Parish* 2555

Electrical, Magnetic and Optical Properties of Condensed Matter

Ohmic contacts to CdS by electrolytic deposition *S Sengupta, P Basu and H Saha* 2565

Monostable switching in amorphous chalcogenide semiconductors
C B Thomas, B D Rogers and A H Lettington 2571

The temperature dependence of the non-ohmic current and switching characteristics of a chalcogenide glass *C B Thomas* 2587

The decrease of the electric current due to formation of electrode coverage in the liquid aromatics benzene and anthracene *H Krause* 2597

Brillouin scattering measurements in molten $AgNO_3$ *L M Torell and H E G Knape* 2605

Ageing effects in zinc selenide electroluminescent diodes *M E Özsan and J Woods* 2613

Geophysics

Suggestions for an experiment with a unipolar generator and its bearing on the Earth's magnetic field *J Djuric* 2623

CORRIGENDA

Estimation of the conductance of channels for rarefied gas flow by means of an optical analogue
L G Carpenter and M J Watts 2639

A light scattering technique for particle sizing based on laser fringe anemometry
N S Hong and A R Jones 2639

SUBJECT INDEX 1976 2641

AUTHOR INDEX 1976 2659

Subject index

The 1976 subject index is based on the IEE Physics Abstracts Classification scheme; articles are listed under one or more of the following headings:

0.000 GENERAL PHYSICS
0.600 Physical instrumentation and experimental techniques
1.000 MATHEMATICAL AND GENERAL THEORETICAL PHYSICS
2.000 ELECTROMAGNETISM AND OPTICS
2.200 Electromagnetism
2.400 Optics
2.600 Quantum optics
2.800 Particle beams and particle optics
4.000 NUCLEAR PHYSICS
5.000 ATOMIC AND MOLECULAR PHYSICS
6.000 GASES, FLUID DYNAMICS AND PLASMAS
6.100 Physics of gases
6.300 Fluid dynamics
6.500 Plasma physics
6.700 Electrical discharges
7.000 CONDENSED MATTER: STRUCTURE, THERMAL AND MECHANICAL PROPERTIES
7.100 Structure of liquids and solids: Crystallography
7.200 Mechanical and acoustic properties
7.400 Equations of state, phase equilibria, phase transitions
7.500 Thermal properties
7.600 Transport properties (non-electronic)
7.800 Surfaces and interfaces: Thin films and whiskers
8.000 CONDENSED MATTER: ELECTRICAL, MAGNETIC AND OPTICAL PROPERTIES
8.100 Electron states
8.200 Electrical transport
8.300 Electrical properties of surfaces, interfaces and thin films
8.400 Superconductivity
8.500 Magnetic properties and materials
8.600 Magnetic resonance and relaxation, Mössbauer effect
8.700 Dielectric properties and materials
8.800 Optical properties and condensed-matter spectroscopy
8.900 Electron and ion emission by liquids and solids and impact phenomena
9.000 INTERDISCIPLINARY SUBJECTS
9.100 Materials science and metallurgy
9.200 Physical chemistry
9.300 Geophysics, earth sciences
9.700 Biophysics and medical physics
9.800 Acoustics

0.000 GENERAL PHYSICS

0.600 Physical instrumentation and experimental techniques

Extended fine structure above the x-ray edge in electron energy loss spectra
R D Leapman and V E Cosslett DL29

The open-circuit voltage of vertical-junction solar cells
M A Green DL57

Radiation-induced current–field characteristics of a triode test cell containing a dielectric solid *C M Feeley and T J Gallagher* DL73

Harmonic generation in $1/f$ noise *D A Bell* DL127

Domain observation in MnBi films with the scanning electron microscope
R Atkinson and G A Jones DL131

Time-lag characteristics of a liquid trigatron
J L Maksiejewski and J H Calderwood DL195

Effects of linear fringe fields on the focusing of a parallel electron beam in a symmetric magnetic spectrometer *A A Kosiara* D1

Assessment of Bishop's absorption correction model in electron probe microanalysis
G Love, M G C Cox and V D Scott D7

Temperature oscillations induced in a mercury bath by horizontal heat flow
B R Pamplin and G H Bolt D145

Efficient magnetic flier plate propulsion
R Bealing and P G Carpenter D157

Consistent theory of electron scattering with atoms in electron microscopes *K Kanaya and S Ono* D161

Image processing of dark-field electron micrographs *W Krakow, K B Welles and B M Siegel* D175
High-performance multilayer interference filters for the region 12–50 μm *C S Evans, R Hunneman and J S Seeley* D309
Optical thickness changes in freshly deposited layers of lead telluride *C S Evans, R Hunneman and J S Seeley* D321
An evaluation of acoustic emission techniques applied to carbon-fibre composites *M Fuwa, A R Bunsell and B Harris* D353
Génération d'une onde ultrasonore plane en forme d'échelon: application a l'étalonnage de récepteurs piézoélectriques *F Lakestani, J C Baboux, P Fleischmann et M Perdrix* D547
A cinematographic study of the quenching process in ionic crystals *R A Keeley and M T Sprackling* D615
Transients in p–n-junction solar cells *S R Dhariwal, L S Kothari and S C Jain* D631
Direct measurement of contamination and etching rates in an electron beam *R F Egerton and C J Rossouw* D659
A direct-view thermal imaging tube *H A H Boot, J G Castledine, P G R King, K E Trezise and B Turner* D679
A multi-gigawatt liquid laser amplifier *M Green, D Andreou, V I Little and A C Selden* D701
The measurement of dielectric anisotropy using a microwave open resonator *R G Jones* D829
Ray-optical analysis of the prism–film coupling efficiency in optical waveguides *P S Chung* D887
Intrinsic energy losses of field-evaporated ions *A R Waugh and M J Southon* D1017
The ultrasonic stress distribution in a specimen with a circular gauge profile *C H Green and F Gulu* D1063 (Corrigenda D1937)
The ultrasonic fatigue testing of specimens much shorter than the testing frequency half-wavelength of the material *C H Green and F Gulu* D1071
Refractive index profiles induced by ion implantation into silica *A P Webb and P D Townsend* D1343
The impulse response and pressure nearfield of a curved ultrasonic radiator *A Penttinen and M Luukkala* D1547
Ultrasonic pulse transmission in cylindrical waveguides *R H Varey* D1661
Production and location of background fringes *K A R Kinloch and S M Fraser* D1813
The effect of non-uniform illumination on the two-point resolution of a microscope using a semi-transparent and π-phase annular aperture *V P Nayyar and N K Verma* D1819
A light scattering technique for particle sizing based on laser fringe anemometry *N S Hong and A R Jones* D1839 (Corrigenda D2639)
A simple method of determining diffusion constants by holographic interferometry *N Bochner and J Pipman* D1825
On the validity of the weak-phase and other approximations in the analysis of electron microscope images *D L Misell* D1849
Ionization loss of relativistic electrons and its fluctuations in gas proportional counters *K Nagata, A Kuge, A Nakamoto, N Hasebe, J Kikuchi and T Doke* D1907
Sound pressure near the focal area of an ultrasonic lens *A Penttinen and M Luukkala* D1927
The determination of the refractive index and thickness of a transparent film *E E Khawaja* D1939
The direct determination of the temperature dependence of the refractive index of liquids and solids *G Abbate, A Attanasio, U Bernini, E Ragozzino and F Somma* D1945
High-resolution profiling of high-energy ion beams *R W Bicknell* D1953
Tilt angle measurements of nematic phases of cyano-biphenyls aligned by obliquely evaporated films *W A Crossland, J H Morrissy and B Needham* D2001
Observation of higher-order lines (ghosts) due to the non-linearity of the film's transmittance–exposure character in holographic Fourier transform spectroscopy *Lin-kuan Su, Chuen-lap Leung and Shih-yu Feng* D2171
Harmonic mixing and frequency measurement at 2·5 THz using Josephson junctions *T G Blaney, N R Cross and D J E Knight* D2175
The origin of spurious peaks in mass spectra *J H Neave and B A Joyce* D2195
Measurements of optical distortion arising from thermal turbulence with application to bubble chambers *V Toal* D2413
Iterative algorithms for single-side-band holography in bright- and dark-field microscopy *A Lannes* D2533
A rapid optical method for the determination of stress-optical constants of optically isotropic and anisotropic materials *S V Kartalopoulos and D D Raftopoulos* D2545

Estimation of the conductance of channels for rarefied gas flow by means of an optical analogue *L G Carpenter and M J Watts* (Corrigenda to 1972 paper) D2639

1.000 MATHEMATICAL AND GENERAL THEORETICAL PHYSICS

Electrophoretic instability in a diffusion-free dielectric liquid in an annular geometry *A T Richardson and R Poulter* DL45
Effects of linear fringe fields on the focusing of a parallel electron beam in a symmetric magnetic spectrometer *A A Kosiara* D1
Assessment of Bishop's absorption correction model in electron probe microanalysis *G Love, M G C Cox and V D Scott* D7
Theoretical calculations of surface-state loss in three-phase charge-coupled devices *M P Singh and D R Lamb* D37
A Monte Carlo approach to the direct simulation of electron penetration in solids *R Shimizu, Y Kataoka, T Ikuta, T Koshikawa and H Hashimoto* D101
Analytic solutions to the Boltzmann equation for electron swarms *J L A Francey and D A Jones* D457
Computer simulation of a nitrogen discharge considering the radial electron drift *K Yoshida and H Tagashira* D485
Computer simulation of a nitrogen discharge at high overvoltages *K Yoshida and H Tagashira* D491 (Corrigenda D1817)
Elastic reinforcement by randomly coiled wires *S F Edwards and A G Miller* D555
Seismic rays in an oblate spheroidal model *L Y Shih* D571
The calculation of temperature distribution, heat flow, component diffusion flows and reaction rates in tungsten halogen lamps *S Lengyel* D709
Ionographic autoradiography: charge distributions and electric field patterns *R J Barish, R A Fox and J W Boag* D879
A thermodynamical study of halogen lamps with carbon additive *T Geszti and T Vicsek* D903
An analysis of a flow instability in nematic liquid crystals *F M Leslie* D925
Integral methods of analysing electric arcs: III. Shape-factor correlation for low radiation and laminar flow *S K Chan, M D Cowley and M T C Fang* D1085
An exact solution to the problem of the time–energy distribution of fast particles slowing down in a multi-species medium *M M R Williams* D1279
Self-triggering of small-scale fuel–coolant interactions: I. Experiments *T A Dullforce, D J Buchanan and R S Peckover* D1295
Some explicit solutions to the non-linear diffusion equation *B Tuck* D1559
On the validity of the weak-phase and other approximations in the analysis of electron microscope images *D L Misell* D1849
The time–energy distribution of atoms in a radiation damage cascade *M M R Williams* D2463
Iterative algorithms for single-side-band holography in bright- and dark-field microscopy *A Lannes* D2533
Suggestions for an experiment with a unipolar generator and its bearing on the Earth's magnetic field *J Djurić* D2623

2.000 ELECTROMAGNETISM AND OPTICS

2.200 Electromagnetism

Harmonic generation in $1/f$ noise *D A Bell* DL127
Efficient magnetic flier plate propulsion *R Bealing and P G Carpenter* D151
Distribution of surface charges on Perspex due to partial discharges *I Sen and V Prabhashanker* D987
Frictional electrification *M I Kornfeld* D1183
A collision model of charge exchange between metal and polymer spheres *S K Ahuja* D1305 (Corrigenda D2169)
TE and TM modes in gyrotropic waveguides *J R Gillies and P Hlawiczka* D1315
Contact electrification of polymers *R Elsdon and F R G Mitchell* D1445
The electrification of polymers by metals *J Lowell* D1571
Elliptically polarized modes in gyrotropic waveguides *P Hlawiczka* D1957

2.400 Optics

Locus of daylight chromaticities in relation to atmospheric conditions *V D P Sastri* DL1
Refractive index profiles induced by ion implantation into silica *A P Webb and P D Townsend* D1343
The effect of non-uniform illumination on the two-point resolution of a microscope using a semi-transparent and π-phase annular aperture *V P Nayyar and N K Verma* D1819
A simple method of determining diffusion constants by holographic interferometry *N Bochner and J Pipman* D1825
Production and location of background fringes *K A R Kinloch and S M Fraser* D1831

The direct determination of the temperature dependence of the refractive index of liquids and solids *G Abbate, A Attanasio, U Bernini, E Ragozzino and F Somma* D1945

Observation of higher-order lines (ghosts) due to the non-linearity of the film's transmittance–exposure character in holographic Fourier transform spectroscopy *Lin-kuan Su, Chuen-lap Leung and Shih-yu Feng* D2171

Measurements of optical distortion arising from thermal turbulence with application to bubble chambers *V Toal* D2413

Resonance anomalies in the light intensity reflected at silver gratings with dielectric coatings *I Pockrand* D2423

2.600 Quantum optics

The application of nonlinear optics methods to studies of transfer RNA in solution *A Dobek, A Patkowski and D Labuda* DL21

Spectroscopic observations of the plasma generated with the 1 GW output of a carbon dioxide laser *G E Bromage, T P Donaldson, B C Fawcett and I J Spalding* DL33

Hole drilling with a repetitively-pulsed TEA CO_2 laser *D C Hamilton and D J James* DL41

Absorption saturation in p-type germanium *P J Bishop, A F Gibson and M F Kimmitt* DL101

Ignition of thermonuclear microexplosions inside an egg-shaped cavity *F Winterberg* DL105

Comments on oscillation amplitude settling transients in a hydrogen maser evoked by rapid frequency scanning *H W Lightfoot and D C Lainé* DL171

Anomalous behaviour of an ammonia beam maser employing a ring focuser *M J Truman and D C Lainé* D175

Surface imaging by scanning-laser-induced voltage *A Olivei* D183

Laser-induced damage to semiconductors *Y Matsuoka* D215

The interaction of CO_2 laser radiation with various solid targets *P E Dyer, S A Ramsden, J A Sayers and M A Skipper* D373 (Corrigenda D1181)

X-ray emission and hydrodynamic expansion of plane carbon targets under the influence of high-intensity laser radiation *M C Marsh and P C Thompson* D383

Field measurements in a pinch discharge using a magneto-optical probe *P Smeulders* D413

Time-resolved laser–Doppler measurements in a high-current arc plasma *P S Todorović, G R Jones and M R Barrault* D423

Ray-optical analysis of the prism–film coupling efficiency in optical waveguides *P S Chung* D887

Time-dependent solutions of the vibrational non-equilibrium flow of CO_2–N_2–H_2O–O_2 mixtures in gas dynamic lasers *A T Jones* D1193

Absolute frequencies of the methane-stabilized HeNe laser (3·39 μm) and the CO_2, R(32) stabilized laser (10·17 μm) *T G Blaney, G J Edwards, B W Jolliffe, D J E Knight and P T Woods* D1323

Photon correlation study of laser speckle produced by a moving rough surface *P N Pusey* D1399

The behaviour of a 10·6 μm pulsed spin-flip Raman laser as a spectroscopic source *B Walker, G W Chantry, D G Moss and C C Bradley* D1501

Negative ion effects in TEA CO_2 lasers *H Shields, A L S Smith and B Norris* D1587

Energy storage and extraction in selected CO_2 laser gases *E Armandillo and I J Spalding* D1719

Electron swarm parameters in CO_2 laser gas mixtures *C S Lakshminarasimha, J Lucas, J L Moruzzi and I J Spalding* D1727

A light scattering technique for particle sizing based on laser fringe anemometry *N S Hong and A R Jones* D1839 (Corrigenda D2639)

Harmonic mixing and frequency measurement at 2·5 THz using Josephson junctions *T G Blaney, N R Cross and D J E Knight* D2175

Hydrodynamic limit to penetration of a material by a high-power beam *J G Andrews and D R Atthey* D2181

Enhanced reflection of laser light from an expanding plasma *I M Begg and R A Cairns* D2341

Line broadening and saturation parameters for short-pulse high-pressure iodine photodissociation laser systems *H J Baker and T A King* D2433

An analysis of the accuracy of time-of-flight ranging at very low signal levels *G J Pert* D2447

A rapid optical method for the determination of stress-optical constants of optically isotropic and anisotropic materials *S V Kartalopoulos and D D Raftopoulos* D2545

Brillouin scattering measurements in molten $AgNO_3$ *L M Torell and H E G Knape* D2605

2.800 Particle beams and particle optics

Hole drilling with a repetitively-pulsed TEA CO_2 laser *D C Hamilton and D J James* DL41

Effects of linear fringe fields on the focusing of a parallel electron beam in a symmetric magnetic spectrometer *A A Kosiara* D1

Consistent theory of electron scattering with atoms in electron microscopes *K Kanaya and S Ono* D161

Image processing of dark-field electron micrographs *W Krakow, K B Welles and B M Siegel* D175

The resolution limit in ion beam experiments due to small angle scattering off background gas *R L Dalglish and J C Kelly* D581

Direct measurement of contamination and etching rates in an electron beam. *R F Egerton and C J Rossouw* D659

Molecular beam maser oscillation on the $J=K=1$ inversion line of $^{14}NH_3$ *A K H Maroof and D C Lainé* D697

A multi-gigawatt liquid laser amplifier *M Green, D Andreou, V I Little and A C Selden* D701

Un canon à ions suprathermiques (5–50 eV) pour l'étude des interactions décharge–surface *G Gautherin et C Lejeune* D1149

Beam optics for ion extraction with a high-voltage-ratio acceleration–deceleration system *Thomas S Green* D1165

An empirical calculation of the energy loss of transmitted electrons at 25–100 keV *V Lantto* D1647

On the validity of the weak-phase and other approximations in the analysis of electron microscope images *D L Misell* D1849

High-resolution profiling of high-energy ion beams *R W Bicknell* D1953

Scattering of 2–20 keV electrons in aluminium *A J Green and R C G Leckey* D2123

Hydrodynamic limit to penetration of a material by a high-power beam *J G Andrews and D R Atthey* D2181

Multiple scattering of fast electrons and their secondary electron generation within semi-infinite targets *H-J Fitting, H Glaefeke, W Wild and G Neumann* D2499

Iterative algorithms for single-side-band holography in bright- and dark-field microscopy *A Lannes* D2533

4.000 NUCLEAR PHYSICS

Moderator heating by neutron slowing down *M M R Williams* DL25

Why use kermas for nuclear heating calculations? *T D Beynon and N P Taylor* DL53

Ignition of thermonuclear microexplosions inside an egg-shaped cavity *F Winterberg* DL105

Neutron yields and energy spectra from the thick target Li(p,n) source *A I M Ritchie* D15

The effect of inelastic scattering on neutron time–energy distribution in an infinitely heavy isotopic medium *K Yamamoto and T Sekiya* D1209

An exact solution to the problem of the time–energy distribution of fast particles slowing down in a multi-species medium *M M R Williams* D1279

The time–energy distribution of atoms in a radiation damage cascade *M M R Williams* D2463

5.000 ATOMIC AND MOLECULAR PHYSICS

On the calculation of the dipole correlation function for a rigid rotator *W T Coffey and A Morita* DL17

20–50 MeV proton-induced x-ray fluorescence from heavy elements *J S C McKee, C P Randell and S F J Wilk* DL159

Comments on oscillation amplitude settling transients in a hydrogen maser evoked by rapid frequency scanning *H W Lightfoot and D C Lainé* DL171

Anomalous behaviour of an ammonia beam maser employing a ring focuser *M J Truman and D C Lainé* DL175

Total ionization and dissociative attachment cross-sections of boron trifluoride by electron impact *M V Kurepa, V M Pejčev and I M Čadež* D489

Determination of gas temperature from unresolved bands in the spectrum from a nitrogen discharge *D M Phillips* D507

The resolution limit in ion beam experiments due to small angle scattering off background gas *R L Dalglish and J C Kelly* D587

Combined spatial and temporal studies of ionization growth in nitrogen *S C Haydon and O M Williams* D523

Molecular beam maser oscillation on the $J=K=1$ inversion line of $^{14}NH_3$ *A K H Maroof and D C Lainé* D697

The flow of dilute aqueous solutions of macromolecules in various geometries: I. Introduction *W M Jones* D721

The flow of dilute aqueous solutions of macromolecules in various geometries: II. Straight pipes of circular cross-section *W M Jones, D E Marshall and P C Walker* D735

The flow of dilute aqueous solutions of macromolecules in various geometries: III. Bent pipes and porous materials *W M Jones and O H Davies* D753
The flow of dilute aqueous solutions of macromolecules in various geometries: IV. The Ergun and Jones equations for flow through consolidated beds *W M Jones* D771
Temperature measurements in detonation waves by emission–absorption of the OH ultraviolet bands *D H Edwards and D E Phillips* D1227
An exact solution to the problem of the time–energy distribution of fast particles slowing down in a multi-species medium *M M R Williams* D1279
The behaviour of some dimethyl- and trimethyl-substituted pyridines in the magnetron *R L Failes, J T Joyce and E C Watton* D1543
Negative ion effects in TEA CO_2 lasers *H Shields, A L S Smith and B Norris* D1587
High-resolution profiling of high-energy ion beams *R W Bicknell* D1953
The flow of dilute aqueous solutions of macromolecules in various geometries: V. Between rotating coaxial cylinders (Couette flow) *W M Jones, A H Thomas and M C Thomas* D1967
The origin of spurious peaks in mass spectra *J H Neave and B A Joyce* D2195
Ionization, attachment and negative ion reactions in carbon dioxide *S R Alger and J A Rees* D2359
Line broadening and saturation parameters for short-pulse high-pressure iodine photodissociation laser systems *H J Baker and T A King* D2433
The time–energy distribution of atoms in a radiation damage cascade *M M R Williams* D2463
Free rotational models for far-infrared absorptions of linear and symmetrical-top molecules dissolved in inert solvents *A Morita, S Walker and J H Calderwood* D2485

6.000 GASES, FLUID DYNAMICS AND PLASMAS

6.100 Physics of gases

Radiation-induced current–field characteristics of a triode test cell containing a dielectric solid *C M Feeley and T J Gallagher* DL73
Analytic solutions to the Boltzmann equation for electron swarms *J L A Francey and D A Jones* D457
The motion of electron swarms in uniform electric fields *H A Blevin, J Fletcher and L M Marzec* D465
The calculation of temperature distribution, heat flow, component diffusion flows and reaction rates in tungsten halogen lamps *S Lengyel* D709
A thermodynamical study of halogen lamps with carbon additive *T Geszti and T Vicsek* D903
The application of low-pressure experimental data to the calculation of electrical discharge thresholds in compressed gases *B H Crichton and D J Tedford* D1079
Time-dependent solutions of the vibrational non-equilibrium flow of CO_2–N_2–H_2O–O_2 mixtures in gas dynamic lasers *A T Jones* D1193
The molecular and reactive thermal conductivities and accommodation coefficients of dissociating hydrogen up to 2400 K *B Stefanov and L Zarkova* D1217
The electron drift velocity and longitudinal diffusion coefficient of an electron swarm in hydrogen at elevated swarm energies *H A Blevin, J Fletcher and S R Hunter* D1671
The Townsend coefficient of ionization in dense gases and fluids *V M Atrazhev, I T Iakubov and V I Roldughin* D1735
Temperature distribution, heat transport, diffusion fluxes and reaction rates in an incandescent lamp with a carbon filament and CF_4 as the active component *S Lengyel* D1655
The stability of shock waves in ionizing and dissociating gases *R W Griffiths, R J Sandeman and H G Hornung* D1681
Energy storage and extraction in selected CO_2 laser gases *E Armandillo and I J Spalding* D1719
Electron swarm parameters in CO_2 laser gas mixtures *C S Lakshminarasimha, J Lucas, J L Moruzzi and I J Spalding* D1727

6.300 Fluid dynamics

Electrophoretic instability in a diffusion-free dielectric liquid in an annular geometry *A T Richardson and R Poulter* DL45
The measurement of positive and negative pressures in a liquid contained in a Berthelot tube *B E Richards and D H Trevena* DL123
An estimate of the ultimate tensile strength of water *S A Sedgewick and D H Trevena* DL203
The interaction of a shock with a dust deposit *B Fletcher* D197

Evidence for cavitation in fluorocarbon liquids subjected to alternating electric fields *J K Nelson and I F M Hashad* D203
The flow of dilute aqueous solutions of macromolecules in various geometries: I. Introduction *W M Jones* D721
The flow of dilute aqueous solutions of macromolecules in various geometries: II. Straight pipes of circular cross-section *W M Jones, D E Marshall and P C Walker* D735
The flow of dilute aqueous solutions of macromolecules in various geometries: III. Bent pipes and porous materials *W M Jones and O H Davies* D753
The flow of dilute aqueous solutions of macromolecules in various geometries: IV. The Ergun and Jones equations for flow through consolidated beds *W M Jones* D771
The erosion of dust by an airflow *B Fletcher* D913
Temperature measurements in detonation waves by emission–absorption of the OH ultraviolet bands *D H Edwards and D E Phillips* D1227
Pressure variation within concentrated settling suspensions *J F Raffle* D1239
The location of the Chapman–Jouguet surface in a multiheaded detonation wave *D H Edwards, A T Jones and D E Phillips* D1331
The break-up of a submerged captive drop of liquid by a jet of the surrounding liquid *D B Scully* D1411
Pumping action from heat-driven oscillations in a liquid–vapour column *J W Sheldon, R A Crane and S C Kranc* D1419
Studies on the settlement of hydrating cement suspensions *A King and J F Raffle* D1425
The stability of shock waves in ionizing and dissociating gases *R W Griffiths, R J Sandeman and H G Hornung* D1681
The flow of dilute aqueous solutions of macromolecules in various geometries: V. Between rotating coaxial cylinders (Couette flow) *W M Jones, A H Thomas and M C Thomas* D1967
Limiting negative pressure of water under dynamic stressing *S A Sedgewick and D H Trevena* D1983
A study of spherical detonation in mixtures of methane and oxygen diluted by nitrogen *D C Bull, J E Elsworth, G Hooper and C P Quinn* D1991
Jump conditions across a collisionless, perpendicular shock *J J Sanderson* D2327
Measurements of optical distortion arising from thermal turbulence with application to bubble chambers *V Toal* D2413
The incipient motion of granular materials *B Fletcher* D2471
Estimation of the conductance of channels for rarefied gas flow by means of an optical analogue *L G Carpenter and M J Watts* (Corrigenda to 1972 paper) D2639

6.500 Plasma physics

Spectroscopic observations of the plasma generated with the 1 GW output of a carbon dioxide laser *G E Bromage, T P Donaldson, B C Fawcett and I J Spalding* DL33
Ignition of thermonuclear microexplosions inside an egg-shaped cavity *F Winterberg* DL105
The measurement of positive and negative pressures in a liquid contained in a Berthelot tube *B E Richards and D H Trevena* DL123
The electron temperature in a positive column with volume recombination *J-S Chang* DL137
Comportement de divers matériaux utilisés comme électrodes d'un générateur de plasma en courant alternatif triphasé *C Bonet, M Foex, R Munz and W H Gauvin* DL141
The interaction of CO_2 laser radiation with various solid targets *P E Dyer, S A Ramsden, J A Sayers and M A Skipper* D373 (Corrigenda D1181)
X-ray emission and hydrodynamic expansion of plane carbon targets under the influence of high-intensity laser radiation *M C Marsh and P C Thompson* D383
Influence of a negatively biased grid on the plasma in a single-ended *Q*-machine *G Popa, N Sato, E Märk, R Schrittwieser and E Mravlag* D397
Field measurements in a pinch discharge using a magneto-optical probe *P Smeulders* D413
Time-resolved laser–Doppler measurements in a high-current arc plasma *P S Todorović, G R Jones and M R Barrault* D423
The instability of electric arcs burning axially in accelerated flow *A M Howatson and D R Topham* D1101
Beam optics for ion extraction with a high-voltage-ratio acceleration–deceleration system *T S Green* D1165
The AC motion of the sheath edge in a flowing high-pressure plasma *B M Oliver, R M Clements and P R Smy* D1173

The continuous flow pinch for production of hot and dense plasma *N F Tsagas and A E Prinn* D1693
Double-probe theory for a continuum low-density plasma *J-S Chang and J G Laframboise* D1699
Plasma diagnosis of a Hall accelerator discharge *P J Lomas* D1705
The effect of relaxation of the quasi-neutral region on the impedance of a planar probe in a static collisional plasma *B M Oliver, R M Clements and P R Smy* D1715
Energy storage and extraction in selected CO_2 laser gases *E Armandillo and I J Spalding* D1719
Electron swarm parameters in CO_2 laser gas mixtures *C S Lakshminarasimha, J Lucas, J L Moruzzi and I J Spalding* D1727
Some modifications of the theory of colloidal plasmas *B R De* D2317
Jump conditions across a collisionless, perpendicular shock *J J Sanderson* D2327
A note on the generalized sheath criterion *J E Allen* D2331
One-dimensional radial compression theory in a continuous flow pinch *N F Tsagas* D2333
Enhanced reflection of laser light from an expanding plasma *I M Begg and R A Cairns* D2341
Theory of electrostatic probes in a low-density flowing continuum plasma: numerical solutions for a sphere stagnation point *K Kodera and J-S Chang* D2349

6.700 Electrical discharges

The violation of similarity laws in electrical discharges in gases *E D Lozansky and G B Pontecorvo* DL37
Comments on Cozens' theory of the gas density distribution near the cathode of an abnormal gas discharge *J C Sherman* DL63
The electron temperature in a positive column with column recombination *J-S Chang* DL137
Calculating the effect of high temperatures on the onset voltages of negative discharges *M Abdel-Salam* DL149
H_α and H_β broadening emitted by minute concentrations of hydrogen in oxygen corona discharges *F Bastien, B Fertil* and *E Marode* DL155
Gas ionization on the axis of a circular waveguide *H Beerwald, G Böhm and B Kampmann* D407
Time-resolved laser–Doppler measurements in a high-current arc plasma *P S Todorović, G R Jones and M R Barrault* D423
Axial velocity variations in high-current free-burning arcs *D C Strachan and M R Barrault* D435
Radio-frequency pulse discharge for investigating reactions in electrical discharges *J E Nicholas and P W Smith* D447
Analytic solutions to the Boltzmann equation for electron swarms *J L A Francey and D A Jones* D457
The motion of electron swarms in uniform electric fields *H A Blevin, J, Fletcher and L M Marzec* D465
An experimental study of photons from a Townsend discharge in hydrogen *H A Blevin, J Fletcher, S R Hunter and L M Marzec* D471
Total ionization and dissociative attachment cross-sections of boron trifluoride by electron impact *M V Kurepa, V M Pejčev and I M Čadež* D481
Computer simulation of a nitrogen discharge considering the radial electron drift *K Yoshida and H Tagashira* D485
Computer simulation of a nitrogen discharge at high overvoltages *K Yoshida and H Tagashira* D491 (Corrigenda D1817)
Determination of gas temperature from unresolved bands in the spectrum from a nitrogen discharge *D M Phillips* D507
Combined spatial and temporal studies of ionization growth in nitrogen *S C Haydon and O M Williams* D523
Transitions between thermionic and vapour arc modes *A J T Holmes* D537
The application of low-pressure experimental data to the calculation of electrical discharge thresholds in compressed gases *B H Crichton and D J Tedford* D1079
Integral methods of analysing electric arcs: III. Shape-factor correlation for low radiation and laminar flow *S K Chan, M D Cowley and M T C Fang* D1085
The instability of electric arcs burning axially in accelerated flow *A M Howatson and D R Topham* D1101
Thermionic emission of an oxide cathode in a low-pressure gas discharge *A Bouwknegt and A G van der Kooi* D1111
A simplified theory for Tonks–Dattner resonances in cylindrical plasmas *J A How and H A Blevin* D1123
Electrical conductivity of highly ionized dense hydrogen plasma: I. Electrical measurements and diagnostics *R Radtke and K Günther* D1131
Electrical conductivity of highly ionized hydrogen plasma: II. Comparison of experiment and theory *K Günther, M M Popovic, S S Popovic and R Radtke* D1139

Un canon à ions suprathermiques (5–50 eV) pour l'étude des interactions décharge–surface *G Gautherin et C Lejeune* D1149
The electron drift velocity and longitudinal diffusion coefficient of an electron swarm in hydrogen at elevated swarm energies *H A Blevin, J Fletcher and S R Hunter* D1671
The stability of shock waves in ionizing and dissociating gases *R W Griffiths, R J Sandeman and H G Hornung* D1681
The Townsend coefficient of ionization in dense gases and fluids *V M Atrazhev, I T Iakubov and V I Roldughin* D1735
Etude des écarts à l'ETL dans un arc d'argon (P=760 Torr) *J Bacri, A M Gomes et S Benzaid* D1743
Transient behaviour of interrupted arcs in steady laminar flow *M T C Fang, S K Chan and M D Cowley* D1757
Erosion of metal cathodes by arcs and breakdowns in vacuum *E Hantzsche, B Jüttner, V F Puchkarov, W Rohrbeck and H Wolff* D1771
Pulvérisation cathodique du titane: étude électrique et spectrometrique de la décharge pour les conditions optimales de dépôt *J M Poitevin, G Lempériere ana C Fourrier* D1783
A new model of microdischarge current growth in vacuum *B P Singh and P A Chatterton* D1797
Optimum conditions for testing electrical fuses: I. Maximization of prearcing energy *C B Wheeler* D1809
Ionization, attachment and negative ion reactions in carbon dioxide *S R Alger and J A Rees* D2359
Analysis of flashes accompanying discharges in air at dielectric surfaces *J S Brzosko, A Konarzewski, A Wojewódzka, E Żukowski and J Grudziński* D2369
Components of cathode erosion in vacuum arcs *J E Daalder* D2379
Micro-particle detection in an electrically stressed vacuum gap *J Smalley* D2397
Ionization in the short pulsed arc *P R Smy* D2403

7.000 CONDENSED MATTER: STRUCTURE, THERMAL AND MECHANICAL PROPERTIES

7.100 Structure of liquids and soils: Crystallography

Extended fine structure above the x-ray edge in electron energy loss spectra *R D Leapman and V E Cosslett* DL29
Microhardness and Schottky defects in alkali halides *M Shukla and K G Bansigir* DL49
Radiation damage and the magnetic domain structure of amorphous GdCo thin films *A Ali, P J Grundy and G A Stephens* DL69
An examination of polished diamond surfaces in the electron microscope *A G Thornton and J Wilks* D27
Etchants to reveal the sites of edge dislocations on (010) cleavage planes of glycine crystals *R M Chaudhari and R S Bharambe* D211
Photon-stimulated current analysis of trap parameters in anthracene *J D Brodribb, D O'Colmain and D M Hughes* D253
The application of the convolution relations in x-ray line breadth analysis: II *R K Nandi and S P Sen Gupta* D593
The application of the convolution relations in the x-ray line breadth analysis: III *R K Nandi and S P Sen Gupta* D601
Transmission electron microscopic studies of stacking faults in molybdenum diselenide *M K Agarwal and B Joseph* D607
Direct observation of the flux distribution in the mixed state of V–Ga alloys using a scanning electron microscope *O Singh, A E Curzon and C C Koch* D611
Direct measurement of contamination and etching rates in an electron beam *R F Egerton and C J Rossouw* D659
Study of photoconductive PbTe films by the method of variance analysis of x-ray diffraction profiles *N L P Sinha, B K Samantary, A K Chaudhuri and H N Bose* D795
An analysis of a flow instability in nematic liquid crystals *F M Leslie* D920
X-ray powder diffraction studies of deformation faults in the metastable face-centred cubic phase of copper–zinc alloys *E Magee and W J Kitchingman* D939
Determination of boron in natural semiconducting diamond by prompt particle nuclear microanalysis and Schottky barrier differential-capacitance measurements *E C Lightowlers and A T Collins* D957
The effect of supersaturation on the induction period of potassium dihydrogen phosphate crystals grown from aqueous solution *B K Paul and M S Joshi* D1253
A study of crystals in the lead oxide/tellurium oxide system *D S Robertson, N Shaw and I M Young* D1257
Refractive index profiles induced by ion implantation into silica *A P Webb and P D Townsend* D1343

Electron-beam-induced conduction in polyethylene terephthalate films *L M Beckley, T J Lewis and D M Taylor* D1355
An x-ray diffraction profile analysis of vacuum-evaporated copper films: normal and oblique vapour incidence *S K Halder, S Sen and S P Sen Gupta* D1867
Tilt angle measurements of nematic phases of cyano-biphenyls aligned by obliquely evaporated films *W A Crossland, J H Morrissy and B Needham* D2001
The effect of cobalt substitutions on some properties of manganese zinc ferrites *A D Giles and F F Westendorp* D2117
Growth striations in KBr(PbI$_4$) single crystals grown from aqueous solution *A R Patel and B P Agarwal* D2513

7.200 Mechanical and acoustic properties

Microhardness and Schottky defects in alkali halides *M Shukla and K G Bansigir* DL 49
The relationship of time-dependent hardness and scratch hardness *A P Gerk* DL179
An estimate of the ultimate tensile strength of water *S A Sedgewick and D H Trevena* DL203
Tensile strength of discontinuous fibre composites—the effect of fibre/matrix interface strength *J Yamaki* D115
Frictional properties of explosives *J K A Amuzu, B J Briscoe and M M Chaudhri* D133 (Corrigenda D677)
Laser-induced damage to semiconductors *Y Matsuoka* D215
Stresses and displacement in lamellar composites: Part II *R G C Arridge and M W B Lock* D329
An evaluation of acoustic emission techniques applied to carbon-fibre composites *M Fuwa, A R Bunsell and B Harris* D353
Fatigue crack propagation in metal-matrix/metal-fibre composites *B Harris, A O Ankara and M A McGuire* D365
Elastic reinforcement by randomly coiled wires *S F Edwards and A G Miller* D555
A cinematographic study of the quenching process in ionic crystals *R A Keeley and M T Sprackling* D615
The indentation behaviour of hard metals *C J Studman and J E Field* D857
Static and dynamic mechanical and optical behaviour of high polymers *D D Raftopoulos, D Karapanos and P S Theocaris* D869
X-ray powder diffraction studies of deformation faults in the metastable face-centred cubic phase of copper–zinc alloys *E Magee and W J Kitchingman* D939
Stress distribution and elastic properties of duplex reinforcing elements with non-fracturing helical cores *J G Morley, R S Millman and A Martin* D1031
The interpretation of the stress intensity term in the 'equation for polymer life' *E Sacher* D1044
Deformation and fracture of poly(ethylene terephthalate) *G L A Sims* D1053
The ultrasonic stress distribution in a specimen with a circular gauge profile *C H Green and F Gulu* D1063 (Corrigenda D1937)
The ultrasonic fatigue testing of specimens much shorter than the testing frequency half-wavelength of the material *C H Green and F Gulu* D1071
The failure of composite materials under high-velocity liquid impact *D A Gorham and J E Field* D1529
Acoustic emission from a notched glass-fibre-reinforced polymer in bending *J T Barnby and T Parry* D1919
Indentation plasticity and the ensuing fracture of glass *M V Swain and J T Hagan* D2201
The friction of carbon fibres *I C Roselman and D Tabor* D2519
A rapid optical method for the determination of stress-optical constants of optically isotropic and anisotropic materials *S V Kartalopoulos and D D Raftopoulos* D2545

7.400 Equations of state, phase equilibria, phase transitions

Silicide formation in Ni–Si Schottky barrier diodes *D J Coe and E H Rhoderick* D965
Pumping action from heat-driven oscillations in a liquid–vapour column *J W Sheldon, R A Crane and S C Kranc* D1419
The electrical conductivity and its relationship to the glass transition temperature of plasticized polyacrylonitrile *R Dewsberry* D2049
The GaAs/Zn solidus at 1000 °C *Brian Tuck* D2061
Application of the phase diagram to the diffusion of Zn in GaP *B Tuck and P R Jay* D2225

7.500 Thermal properties

Extension of the Maxwell–Wagner equation for conducting dielectrics *D J Jeffrey* DL93

A cinematographic study of the quenching process in ionic crystals *R A Keeley* and *M T Sprackling* D615

7.600 Transport properties (non-electronic)

The thermal resistivity of diamond heat-sink bond materials *P R W Hudson* D225

The thermal conductivity of 'isotropic' and hot-pressed boron nitride *A Simpson and A D Stuckes* D621

The thermal conductivity of epoxy-resin/metal-powder composite materials from 1·7 to 300 K *F F T de Araujo and H M Rosenberg* D665

Self-triggering of small-scale fuel–coolant interactions: I. Experiments *T A Dullforce, D J Buchanan and R S Peckover* D1295

Some explicit solutions to the non-linear diffusion equation *B Tuck* D1559

Temperature distribution, heat transport, diffusion fluxes and reaction rates in an incandescent lamp with a carbon filament and CF_4 as the active component *S Lengyel* D1655

A simple method of determining diffusion constants by holographic interferometry *N Bochner and J Pipman* D1825

Application of the phase diagram to the diffusion of Zn in GaP *B Tuck and P R Jay* D2225

7.800 Surfaces and interfaces: Thin films and whiskers

The relationship of time-dependent hardness and scratch hardness *A P Gerk* DL179

An examination of polished diamond surfaces in the electron microscope *A G Thornton and J Wilks* D27

Surface imaging by scanning-laser-induced voltage *A Olivei* D183

Etchants to reveal the sites of edge dislocations on (010) cleavage planes of glycine crystals *R M Chaudhuri and R S Bharambe* D211

The compositional and structural changes that accompany the thermal annealing of (100) surfaces of GaAs, InP and GaP in vacuum *C R Bayliss and D L Kirk* D233

Silicide formation in Ni–Si Schottky barrier diodes *D J Coe and E H Rhoderick* D965

The electrical properties of ultrathin gold films during and after their growth on glass *T Andersson* D973

An x-ray diffraction profile analysis of vacuum-evaporated copper films: normal and oblique vapour incidence *S K Halder, S Sen and S P Sen Gupta* D1867

A theory dealing with the vacuum evaporation and deposition of binary semiconducting compounds, with special reference to the thermal evaporation of zinc selenide *D L Kirk* and *M S Raven* D2015

Epitaxial growth of chromium electrodeposits on oriented single-crystal surfaces of austenitic stainless steel *B Rivolta, M Lazzari and L P Bicelli* D2215

The chemical nature of the interface in Ge–ZnSe heterojunctions: a study with molecular beam techniques *A W Brinkman and D L Kirk* D2239

Growth striations in $KBr(PbI_3)$ single crystals grown from aqueous solution *A R Patel and B P Agarwal* D2511

Interpretation of the temperature dependence of partition and sticking coefficients for antimony, phosphorus and boron in silicon *R J Bennett and C Parish* D2555

8.000 CONDENSED MATTER: ELECTRICAL, MAGNETIC AND OPTICAL PROPERTIES

8.100 Electron states

Emission from the (110) face of negative-electron affinity gallium arsenide *M G Burt and J C Inkson* DL5

A study of emission from the (111) faces of GaAs negative electron affinity photoemitters *M G Burt and J C Inkson* D43

Properties of silicon–metal contacts versus metal work-function, silicon impurity concentration and bias voltage *B Pellegrini* D55

8.200 Electrical transport

Difficulties in observing direct optical excitation of Si–SiO_2 interface states *K Y Tong and Y W Lam* DL9

Extension of the Maxwell–Wagner equation for conducting dielectrics *D J Jeffrey* DL93

Harmonic generation in $1/f$ noise *D A Bell* DL127

Short resistive contacts to Hall specimens *H J Goldsmid and C J Milner* DL183

Theoretical calculations of surface-state loss in three-phase charge-coupled devices *M P Singh and D R Lamb* D37

TSD current studies of iodine-doped polyvinyl-acetate thin films *P C Mehendru, K Jain and P Mehendru* D83

Electrical resistivity, TCR and thermoelectric power of annealed thin copper films *V V R Narasimha Rao, S Mohan and P J Reddy* D89

Negative resistance and memory effects in GaTe single crystals *C Paorici, N Romeo and L Tarricone* D245
Photon-stimulated current analysis of trap parameters in anthracene *J D Brodribb, D O'Colmain and D M Hughes* D253
Compensation and the mechanisms of electrical conduction in plasticized PVC *R Dewsberry* D265
Electrical conduction in the $ZnSiAs_{2-x}P_x$ system *R F Stroud and W C Clark* D273
Transients in p–n-junction solar cells *S R Dhariwal, L S Kothari and S C Jain* D631
The thermal conductivity of epoxy-resin/metal-powder composite materials from 1·7 to 300 K *F F T de Araujo and H M Rosenberg* D665
Two-dimensional simulation of the charge transfer process in charge-coupled devices using a particle model *W Fawcett and G F Vanstone* D773 (Corrigenda D1937)
Transmission silicon photoemitters and electron multipliers *J R Howorth, J R Folkes, I C Palmer, R Holtom, C J R Sheppard and E W L Trawny* D785 (Corrigenda D2169)
Study of photoconductive PbTe films by the method of variance analysis of x-ray diffraction profiles *N L P Sinha, B K Samantary, A K Chaudhuri and H N Bose* D795
The electrical properties of zinc selenide *G Jones and J Woods* D799
Switching behaviour and DC electrical conductivity of epoxy-resin/metal-powder composites *F F T de Araujo and H M Rosenberg* D1025
Trap distribution in $ZnIn_2S_4$ from photoconductivity analysis *A Serpi* D1881
The influence of the second harmonic on the fundamental frequency negative conductance of GaAs Gunn devices *P C Mathur, A K Dhall, S K Lomash and M L Goyal* D1893
Origin of absorption and resorption currents in the co-polymer poly(hexafluoropropylene-tetrafluoroethylene) *P J Atkinson and R J Fleming* D2027
A study of absorption currents in polypropylene *D K Das Gupta and K Joyner* D2041
The electrical conductivity and its relationship to the glass transition temperature of plasticized polyacerylonitrile *R Dewsberry* D2049
The GaAs/Zn solidus at 1000 °C *B Tuck* D2061
Electrical resistivity anisotropy measuremen *J E Aubrey and K Anagnostopoulos* D2221
Application of the phase diagram to the diffusion of Zn in GaP *B Tuck and P R Jay* D2225

8.300 Electrical properties of surfaces, interfaces and thin films

Emission from the (110) face of negative-electron affinity gallium arsenide *M G Burt and J C Inkson* DL5
Difficulties in observing direct optical excitation of Si–SiO_2 interface states *K Y Tong and Y W Lam* DL9
The open-circuit voltage of vertical-junction solar cells *M A Green* DL57
The effect of water on thermally stimulated currents in PTFE *M R Grinter and C Bowlt* DL61
On the origin of asymmetry in the two-site hopping model under a high electric field *H Adachi, Y Yamazaki, T Hariu and Y Shibata* DL85
A time-dependent anomalous threshold in silicon MOS devices fabricated on high-resistivity substrates *R J Nicholas and R A Stradling* DL109
Long-life green n/p semiconductor lamps *J R Fitzpatrick, B F Jones and K J Downton* DL129
Short resistive contacts to Hall specimens *H J Goldsmid and C J Milner* DL183
A study of emission from the (111) faces of GaAs negative electron affinity photoemitters *M G Burt and J C Inkson* D43
Properties of silicon–metal contacts versus metal work-function, silicon impurity concentration and bias voltage *B Pellegrini* D55
An experimental study of the electrical properties of the contact between two similar semiconductor crystals *J W Orton, A H M Kipperman and J A Beun* D69
TSD current studies of iodine-doped polyvinylacetate thin films *P C Mehendru, K Jain and P Mehendru* D83
Electrical resistivity, TCR and thermoelectric power of annealed thin copper films *V V R Narasimha Rao, S Mohan and P J Reddy* D89
Compensation and the mechanisms of electrical conduction in plasticized PVC *R Dewsberry* D265
Transients in p–n-junction solar cells *S R Dhariwal, L S Kothari and S C Jain* D631
A study of the interface between germanium and silicon *J R Crooks and M J Hampshire* D643

Two-dimensional simulation of the charge transfer process in charge-coupled devices using a particle model *W Fawcett and G F Vanstone* D773 (Corrigenda D1937)
On the nature of absorption currents in polyethyleneteraphthalate (PET) *D K Das Gupta and K Joyner* D829
Determination of boron in natural semiconducting diamond by prompt particle nuclear microanalysis and Schottky barrier differential-capacitance measurements *E C Lightowlers and A T Collins* D951
Silicide formation in Ni–Si Schottky barrier diodes *D J Coe and E H Rhoderick* D965
The electrical properties of ultrathin gold films during and after their growth on glass *T Andersson* D973
Switching behaviour and DC electrical conductivity of epoxy-resin/metal-powder composites *F F T de Araujo and H M Rosenberg* D1025
Frictional electrification *M I Kornfeld* D1183
A collision model of charge exchange between metal and polymer spheres *S K Ahuja* D 1305 (Corrigenda D2169)
Electron-beam-induced conduction in polyethylene terephthalate films *L M Beckley, T J Lewis and D M Taylor* D1355
Contact electrification of polymers *R Elsdon and F R G Mitchell* D1445
Dielectric and interface-state measurements of metal–spin-on-oxide–silicon capacitors *Y W Lam and H C Lam* D1477
The electrification of polymers by metals *J Lowell* D1571
Electrical properties of $Zn_xHg_{1-x}Te$ thin films *M C Petty and C Juhasz* D1605
Charge, current and electric field development in a film of insulating material with traps *J Q Bartling* D1619
Origin of absorption and resorption currents in the co-polymer poly(hexafluoro-propylene-tetrafluoroethylene) *P J Atkinson and R J Fleming* D2027
A study of absorption currents in polypropylene *D K Das Gupta and K Joyner* D2041
The electrical conductivity and its relationship to the glass transition temperature of plasticized polyacrylonitrile *R Dewsberry* D2049
High-field effects in chalcogenide switching glasses *D Allsopp and M J Thompson* D2075
An electrical resistance analysis of the erbium–hydrogen system *B Singh, N A Surplice and J Müller* D2087
Interpretation of the surface boundary conditions in the diffusion model for NEA photoemission *M G Clark* D2139
Effect of overlayer thickness on electron emission from Si:Cs–O NEA surfaces *M G Clark, J R Howorth and R Holtom* D2155
The chemical nature of the interface in Ge–ZnSe heterojunctions: a study with molecular beam techniques *A W Brinkman and D L Kirk* D2239
Barrier heights and surface states of metal–polymer (PET) contacts *T Mizutani, Y Takai, T Osawa and M Ieda* D2253
The electrical resistivity and temperature coefficient of resistivity of cobalt films *A K Pal, S Chaudhuri and A K Barua* D2261
Electron-beam charging of polyethylene terephthalate films *D M Taylor* D2269
Ohmic contacts to CdS by electrolytic deposition *S Sengupta, P Basu and H Saha* D2565
Monostable switching in amorphous chalcogenide semiconductors *C B Thomas, B D Rogers and A H Lettington* D2571
The temperature dependence of the non-ohmic current and switching characteristics of a chalcogenide glass *C B Thomas* D2587
Ageing effects in zinc selenide electroluminescent diodes *M E Özsan and J Woods* D2613

8.400 Superconductivity

Use of persistent supercurrents in SQUID current stabilizers and their application to a resistivity measurement on niobium *J C Gallop* D2111
On the flux jumps in hard superconductors *M G Kremlev, R G Mints and A L Rakhmanov* D279
Direct observation of the flux distribution in the mixed state of V–Ga alloys using a scanning electron microscope *O Singh, A E Curzon and C C Koch* D611
Harmonic mixing and frequency measurement at 2·5 THz using Josephson junctions *T G Blaney, N R Cross and D J E Knight* D2175
On the theory of flux jumps in hard superconductors *R G Mints and A L Rakhmanov* D2281

8.500 Magnetic properties and materials

Radiation damage and the magnetic domain structure of amorphous GdCo thin films *A Ali, P J Grundy and G A Stephens* DL69

Magneto-optic diffraction and magnetization of thin films *S Kern and D J Craik* DL81
Domain observation in MnBi films with the scanning electron microscope *R Atkinson and G A Jones* DL131
The observation of stripe domains in amorphous GdCo films prepared by evaporation *S S Nandra and P J Grundy* DL167
Eddy current loss calculations for skew, braket and wedge domain walls as in (110) [001] SiFe laminations *J E L Bishop* D291
The field of the propagating circuits of bubble devices *M A Wanas* D811
The variation of coercivity with particle size *G Rowlands* D1267
The influence of a random domain size distribution on the eddy-current contribution to hysteresis in transformer steel *J E L Bishop* D1367
The demagnetizing field of elliptical cylindrical domains *M A Wanas and N H Hegazi* D1461
The temperature dependence and heat treatment behaviour of epitaxial $(YSmCa)_3(FeGe)_5O_{12}$ *M E Jones and P J Fiddyment* D1467
Estimation of the number of domain walls during flux reversal in 50% Ni–Fe tape cores *Y Sakaki and T Anayama* D1899
Eddy-current-limited growth of ferromagnetic domains on the surface of square-loop alloy tapes *J E L Bishop* 2095
The effect of cobalt substitutions on some properties of manganese zinc ferrites *A D Giles and F F Westendorp* D2117

8.600 Magnetic resonance and relaxation, Mössbauer effect

A Mössbauer effect study of plant and animal fossils *N A Eissa, H A Sallam, B A Ashi, M Y Hassan and S A Saleh* D1391

8.700 Dielectric properties and materials

On the calculation of the dipole correlation function for a rigid rotator *W T Coffey and A Morita* DL17
Electrophoretic instability in a diffusion-free dielectric liquid in an annular geometry *A T Richardson and R Poulter* DL45
Radiation-induced current–field characteristics of a triode test cell containing a dielectric solid *C M Feeley and T J Gallagher* DL73
Effect of polarity and gap length on the breakdown characteristics of mineral oil for non-uniform fields *A A Zaky, A Nossein, I Y Megahed and C Evangelou* DL77
On the origin of asymmetry in the two-site hopping model under a high electric field *H Adachi, Y Yamazaki, T Hariu and Y Shibata* DL85
Prebreakdown phenomena in liquids: electronic processes *J C Devins, S J Rzad and R J Schwabe* DL87
Extension of the Maxwell–Wagner equation for conducting dielectrics *D J Jeffrey* DL93
The electrical polarizability of a two-dimensional itinerant oscillator *W T Coffey, T Ambrose and J H Calderwood* DL115
Time-lag characteristics of a liquid trigatron *J L Maksiejewski and J H Calderwood* DL195
On corona light emission in dielectric liquids *H Metzler and W F Schmidt* DL199
New observations of pre-breakdown events in n-hexane in a point-plane configuration *F Heiman, P Sibillot and R Coelho* D95
Evidence for cavitation in fluorocarbon liquids subjected to alternating electric fields *J K Nelson and I F M Hashad* D203
Génération d'une onde ultrasonore plane en forme d'échelon: application a l'étalonnage de récepteurs piézoélectriques *F Lakestani, J C Baboux, P Fleischmann et M Perdrix* D547
A direct-view thermal imaging tube *H A H Boot, J G Castledine, P G R King, K E Trezise and B Turner* D679
The measurement of dielectric anisotropy using a microwave open resonator *R G Jones* D819
On the nature of absorption currents in polyethyleneteraphthalate (PET) *D K Das Gupta and K Joyner* D829
The effect of organic additives on the breakdown and gassing properties of mineral oils *A A Zaky, I Y Megahed and C Evangelou* D841
A luminescent and fluorescent region associated with prebreakdown and breakdown in n-hexane *C Chiu* D851
Distribution of surface charges on Perspex due to partial discharges *I Sen and V Prabhashanker* D987
The surface layer effect in TGS, KDP and Rochelle salt *A Mansingh and Eswar Prasad SRJ* D1379
Dielectric and interface-state measurements of metal–spin-on-oxide–silicon capacitors *Y W Lam and H C Lam* D1477

The effects of temperature and pressure on the complex dielectric permittivity of liquid eugenol and glycerol *W G S Scaife* D1489
Origin of absorption and resorption currents in the co-polymer poly(hexafluoropropylene-tetrafluoroethylene) *P J Atkinson and R J Fleming* D2027
A study of absorption currents in polypropylene *D K Das Gupta and K Joyner* D2041
High-field effects in chalcogenide switching glasses *D Allsopp and M J Thompson* D2075
Barrier heights and surface states of metal–polymer (PET) contacts *T Mizutani, Y Takai, T Osawa and M Ieda* D2253
Electrical breakdown of mineral oil under non-uniform fields *A A Zaky, A Nosseir, I Y Megahed and C Evangelou* D2287
A theoretical interpretation of the pyroelectric response from a scanning microheat probe. *R V Latham* D2295
Analysis of flashes accompanying discharges in air at dielectric surfaces *J S Brzosko, A Konarzewski, A Wojewódzka, E Żukowski and J Grudziński* D2369
Resonance anomalies in the light intensity reflected at silver gratings with dielectric coatings *I Pockrand* D2423
Free rotational models for far-infrared absorptions of linear and symmetrical-top molecules dissolved in inert solvents *A Morita, S Walker and J H Calderwood* D2485
The decrease of the electric current due to formation of electrode coverage in the liquid aromatics benzene and anthracene *H Krause* D2597

8.800 Optical properties and condensed matter spectroscopy

Investigation of the photochromic effect in erbium-doped tellurite glasses *J G Koen, M A Res, R O Heckroodt and V Hasson* DL13
The application of nonlinear optics methods to studies of transfer RNA in solution *A Dobek, A Patkowski and D Labuda* DL21
Magneto-optic diffraction and magnetization of thin films *S Kern and D J Craik* DL81
Absorption saturation in p-type germanium *P J Bishop, A F Gibson and M F Kimmitt* DL101
A V_2O_5 phosphate filter glass with bandpass in the visible region *M A Res, C J Kok and J Bednarik* DL119
Long-life green n/p semiconductor lamps *J R Fitzpatrick, B F Jones and K J Downton* DL129
High-performance multilayer interference filters for the region 12–50 μm *C S Evans, R Hunneman and J S Seeley* D309
Optical thickness changes in freshly deposited layers of lead telluride *C S Evans, R Hunneman and J S Seeley* D321
Static and dynamic mechanical and optical behaviour of high polymers *D D Raftopoulos, D Karapanos and P S Theocaris* D869
Optical diffraction studies of sound waves in lithium niobate *W S Goruk, R Normandin, P J Vella and G I Stegeman* D999
The effect of cooling rate on the performance of thermoluminescent dosimeter crystals (TLD-100) and LiF crystals *M H Bradbury, B C E Nwosu and E Lilley* D1009
Thermoluminescence of LiF TLD-100 by phototransfer *C M Sunta and S Watanabe* D1271
Comparison of deflection and modulation characteristics of symmetrically and asymmetrically electroded electro-optic devices *V Ramachandran and A W Palmer* D1387
The behaviour of a 10·6 μm pulsed spin-flip Raman laser as a spectroscopic source *B Walker, G W Chantry, D G Moss and C C Bradley* D1501
Cathodoluminescence of CaS:Ce phosphor *D R Vij, V K Mathur, V Shank and P K Ghosh* D1509
Optical properties of discontinuous gold films *D N Jarrett and L Ward* D1515
The optical properties of thin films of cadmium and zinc selenides and tellurides *Thutupalli G K M and S G Tomlin* D1639
An empirical calculation of the energy loss of transmitted electrons at 25–100 keV *V Lantto* D1647
The determination of the refractive index and thickness of a transparent film *E E Khawaja* D1939
Observation of higher-order lines (ghosts) dur to the non-linearity of the film's transmittance–exposure character in holographic Fourier transform spectroscopy *Lin-kuan Su, Chuen-lap Leung and Shih-yu Feng* D2171
Barrier heights and surface states of metal–polymer (PET) contacts *T Mizutani, Y Takai, T Osawa and M Ieda* D2253
Optical absorption in $Zn_xHg_{1-x}Te$ thin films *M C Petty and C Juhasz* D2305
Ohmic contacts to CdS by electrolytic deposition *S Sengupta, P Basu and H Saha* D2565

Brillouin scattering measurements in molten $AgNO_3$ *L M Torell and H E G Knape* D2605
Ageing effects in zinc selenide electroluminescent diodes *M E Özsan and J Woods* D2613

8.900 Electron and ion emission by liquids and solids and impact phenomena
Emission from the (110) face of negative-electron affinity gallium arsenide *M G Burt and J C Inkson* DL5
Hole drilling with a repetitively-pulsed TEA CO_2 laser *D C Hamilton and D J James* DL41
Field emission studies of the lanthanum hexaboride/tungsten system *P L Kanitkar, C V Dharmadhikari, D S Joag and V N Shukla* DL165
The energies of ions and neutrals in ion plating *D G Teer* DL187
Comments on 'intrinsic energy losses of field-evaporated ions' *R G Forbes* DL191
A study of emission from the (111) faces of GaAs negative electron affinity photoemitters *M G Burt and J C Inkson* D43
A Monte Carlo approach to the direct simulation of electron penetration in solids *R Shimizu, Y Kataoka, T Ikuta, T Koshikawa and H Hashimoto* D101
The compositional and structural changes that accompany the thermal annealing of (100) surfaces of GaAs, InP and GaP in vacuum *C R Bayliss and D L Kirk* D233
Transmission silicon photoemitters and electron multipliers *J R Howorth, J R Folkes, I C Palmer, R Holtorn, C J R Sheppard and E W L Trawney* D785 (Corrigenda D2169)
Intrinsic energy losses of field-evaporated ions *A R Waugh and M J Southon* D1017
Thermionic emission of an oxide cathode in a low-pressure gas discharge *A Bouwknegt and A G van der Kooi* D1111
Refractive index profiles induced by ion implantation into silica *A P Webb and P D Townsend* D1343
The behaviour of some dimethyl- and trimethyl-substituted pyridines in the magnetron *R L Falles, J T Joyce and E C Watton* D1543
An empirical calculation of the energy loss of transmitted electrons at 25–100 keV *V Lantto* D1647
Erosion of metal cathodes by arcs and breakdowns in vacuum *E Hantzsche, B Jüttner, V F Puchkarov, W Rohrbeck and H Wolff* D1771
Pulvérisation cathodique du titane: étude électrique et spectrometrique de la décharge pour les conditions optimales de dépôt *J M Poitevin, G Lempérière and C Fourrier* D1783
Ionization loss of relativistic electrons and its fluctuations in gas proportional counters *K Nagata, A Kuge, A Nakamoto, N Hasebe, J Kikuchi and T Doke* D1907
Scattering of 2–20 keV electrons in aluminium *A J Green and R C G Leckey* D2123
Interpretation of the surface boundary conditions in the diffusion model for NEA photoemission *M G Clark* D2139
Effect of overlayer thickness on electron emission from Si:Cs–O NEA surfaces *M G Clark, J R Howorth and R Holtom* D2155
Hydrodynamic limit to penetration of a material by a high-power beam *J G Andrews and D R Atthey* D2181
Electron-beam charging of polyethylene terephthalate films *D M Taylor* D2269
Multiple scattering of fast electrons and their secondary electron generation within semi-infinite targets *H-J Fitting, H Glaefeke, W Wild and G Neumann* D2499
The decrease of the electric current due to formation of electrode coverage in the liquid aromatics benzene and anthracene *H Krause* D2597

9.000 INTERDISCIPLINARY SUBJECTS
9.100 Materials science and metallurgy
Microhardness and Schottky defects in alkali halides *M Shukla and K G Bansigir* DL49
Comportement de divers matériaux utilises comme électrodes d'un générateur de plasma en courant alternatif triphasé *C Bonet, M Foex, R Munz and W H Gauvin* DL141
The relationship of time-dependent hardness and scratch hardness *A P Gerk* DL179
Tensile strength of discontinuous fibre composites—the effect of fibre/matrix interface strength *J Yamaki* D115
Frictional properties of explosives *J K A Amuzu, B J Briscoe and M M Chaudhri* D133 (Corrigenda D677)
The interaction of a shock with a dust deposit *B Fletcher* D197
The thermal resistivity of diamond heat-sink bond materials *P R W Hudson* D225
Stresses and displacements in lamellar composites: Part II *R G C Arridge and M W B Lock* D329

An evaluation of acoustic emission techniques applied to carbon-fibre composites *M Fuwa, A R Bunsell and B Harris* D353
Fatigue crack propagation in metal-matrix/metal-fibre composites *B Harris, A O Ankara and M A McGuire* D365
Génération d'une onde ultrasonore plane en forme d'échelon: application a l'étalonnage de récepteurs piézoélectriques *F Lakestani, J C Baboux, P Fleischmann et M Perdrix* D547
Elastic reinforcement by randomly coiled wires *S F Edwards and A G Miller* D555
The thermal conductivity of epoxy-resin/metal-powder composite materials from 1·7 to 300 K *F F T de Araujo and H M Rosenberg* D665
The indentation behaviour of hard metals *C J Studman and J E Field* D857
Static and dynamic mechanical and optical behaviour of high polymers *D D Raftopoulos, D Karapanos and P S Theocaris* D869
The erosion of dust by an airflow *B Fletcher* D913
X-ray powder diffraction studies of deformation faults in the metastable face-centred cubic phase of copper–zinc alloys *E Magee and W J Kitchingman* D939
Switching behaviour and DC electrical conductivity of epoxy-resin/metal-powder composites *F F T de Araujo and H M Rosenberg* D1025
Stress distribution and elastic properties of duplex reinforcing elements with non-fracturing helical cores *J G Morley, R S Millman and A Martin* D1031
The interpretation of the stress intensity term in the 'equation for polymer life' *E Sacher* D1044
Deformation and fracture of poly(ethylene terephthalate) *G L A Sims* D1053
The ultrasonic stress distribution in a specimen with a circular gauge profile *C H Green and F Guiu* D1063 (Corrigenda D1937)
The ultrasonic fatigue testing of specimens much shorter than the testing frequency half-wavelength of the material *C H Green and F Guiu* D1071
Pressure variation within concentrated settling suspensions *J F Raffle* D1239
The effect of supersaturation on the induction period of potassium dihydrogen phosphate crystals grown from aqueous solution *B K Paul and M S Joshi* D1253
A study of crystals in the lead oxide/tellurium dioxide system *D S Robertson, N Shaw and I M Young* D1257
Studies on the settlement of hydrating cement suspensions *A King and J F Raffle* D1425
The failure of composite materials under high-velocity liquid impact *D A Gorham and J E Field* D1529
Acoustic emission from a notched glass-fibre-reinforced polymer in bending *J T Barnby and T Parry* D1919
Indentation plasticity and the ensuing fracture of glass *M V Swain and J T Hagan* D2201
The incipient motion of granular materials *B Fletcher* D2471
Growth striations in KBr(PbI$_3$) single crystals grown from aqueous solution *A R Patel and B P Agarwal* D2511
The friction of carbon fibres *I C Roselman and D Tabor* D2517
A rapid optical method for the determination of stress-optical constants of optically isotropic and anisotropic materials *S V Kartalopoulos and D D Raftopoulos* D2545
Interpretation of the temperature dependence of partition and sticking coefficients for antimony, phosphorus and boron in silicon *R J Bennett and C Parish* D2555

9.200 Physical chemistry

Frictional properties of explosives *J K A Amuzu, B J Briscoe and M M Chaudhri* D133 (Corrigenda D677)
Radio-frequency pulse discharge for investigating reactions in electrical discharges *J E Nicholas and P W Smith* D447
The behaviour of some dimethyl- and trimethyl-substituted pyridines in the magnetron *R L Failes, J T Joyce and E C Watton* D1543
Temperature distribution, heat transport, diffusion fluxes and reaction rates in an incandescent lamp with a carbon filament and CF_4 as the active component *S Lengyel* D1655
The electrical conductivity and its relationship to the glass transition temperature of plasticized polyacrylonitrile *R Dewsberry* D2049
Epitaxial growth of chromium electrodeposits on oriented single-crystal surfaces of austenitic stainless steel *B Rivolta, M Lazzari and L P Bicelli* D2215
Application of the phase diagram to the diffusion of Zn in GaP *B Tuck and P R Jay* D2225

The chemical nature of the interface in Ge–ZnSe heterojunctions: a study with molecular beam techniques *A W Brinkman and D L Kirk* D2239
Ohmic contacts to CdS by electrolytic deposition *S Sengupta, P Basu and H Saha* D2565

9.300 Geophysics, Earth sciences

Locus of daylight chromaticities in relation to atmospheric conditions *V D P Sastri* DL1
Seismic rays in an oblate spheroidal model *L Y Shih* D571
A Mössbauer effect study of plant and animal fossils *N A Eissa, H A Sallam, B A Ashi, M Y Hassan and S A Saleh* D1391
Suggestions for an experiment with a unipolar generator and its bearing on the Earth's magnetic field *J Djurić* D2623

9.700 Biophysics and medical physics

Ionographic autoradiography: charge distributions and electric field patterns *R J Barish, R A Fox and J W Boag* D879

9.800 Acoustics

The impulse response and pressure nearfield of a curved ultrasonic radiator *A Penttinen and M Luukkala* D1547
Ultrasonic pulse transmission in cylindrical waveguides *R H Varey* D1661
Sound pressure near the focal area of an ultrasonic lens *A Penttinen and M Luukkala* D1927
